## About VIT

Vellore Institute of Technology (VIT) was founded in 1984 as Vellore Engineering College by the honourable Chancellor Dr. G. Viswanathan. The institution has grown steadily since its humble beginning. VIT attracts students from all over India and more than 50 countries because of its excellence. VIT has emerged as one of India's best institutes and aspires to become a global leader in education. Quality in teaching-learning, research and innovation make VIT a unique place to learn. The credentials in academics and research have placed VIT in the 12<sup>th</sup> position among the engineering institutions in India by NIRF, Govt. of India. VIT is Ranked within the top 200 in Asia (QS - Asia University Rankings 2022). VIT achieved NAAC Accreditation from the Government of India with A++ grade in the 4<sup>th</sup> cycle.

## About CFM

The Centre for Functional Materials (CFM) at VIT, Vellore was established in Nov 2020. The centre prioritizes the research of national interest by highlighting new findings and discussing current trends in technologically reverent topics. Here, we explore different classes of functional materials ranging from semiconductors to polymers and molecular crystals to nanoparticles. CFM has also provided various state-of-the-art characterization facilities like optical, microhardness, gas sensing, dielectric, electrical studies, computational tools etc. The centre has gained attention due to its immense publications in the diverse fields of research in functional materials. CFM is offering a platform to connect a broad range of materials with focused research groups and support multidisciplinary research necessary for technology transfer. The centre implements its mission via activities in research and education.

## About the Conference

Modern scientific and technological advancements result from collaborative efforts based on various aspects of science and engineering. One of the current forefronts of the research is invested in developing new functional materials to meet future challenges like energy, water, and health. Scientists are constantly looking for alternative approaches to address them for economic and social prosperity. For this, the exchange of ideas among scientists and researchers belonging to different streams of science, technology, and industry is necessary. In this regard, the Centre for Functional Materials at Vellore Institute of Technology, Vellore, is bringing up a unique opportunity for students, researchers, faculty, scientists, and experts from industries with shared interests in functional materials.

We are organizing an International Conference on Functional Materials for Future Technology from 19<sup>th</sup> - 21<sup>st</sup> April 2023, where speakers from various scientific expertise will share their knowledge and experience. As the event will be organized in a hybrid mode, we have the flexibility of inviting experts in-person and online mode from different areas of research all over the world. The goal of IC-FMFT 2023 is to create an opportunity for the participants to explore and collaborate on interdisciplinary subjects in physics, chemistry, material science and engineering.
