(a) East (b) West (C) North (D) South

Comprehensive Test:

Read the following passage carefully and answer the questions given below it.

A couple of months ago I was asked what I thought the future of technology in education was. It is a really thought-provoking question Technology changes a fast pace and making it available to pupils, Educators and other stakeholders is an ongoing challenge.

So what is the future? Is it the device?

Any device and other mobile technology are the 'now'. Although, they will play a part in the future, some decades ago the mobile didn't even exist. We don't know what will be the current technology in other four years. Perhaps it will be wearable devices such as Google glass, although I suspect that applications will still be used in education. The future is about availability, anywhere learning and collaboration, both locally and globally. Teaching and learning is going to be social. Business Schools of the future could have a traditional cohort of students, as well as online only students who live across the country or even the world. Things are already starting to move this way with the emergence of massive open online courses (moocs). For me, the future of technology in education is the cloud. Technology can often be a barrier for both teachers and learners. I think the cloud will go a long way to removing this barrier. B Schools, will only need one major thing to be prepared for the future. They will not need software installed, servers or local file storage. Schools will need a fast robust internet connection. Infrastructure is paramount to the future of technology in education.

8. What do you think should be the most appropriate title of the given passage?
 - (a) Hypothetical approach to B School Education
 - (b) Technology barrier to B School Education
 - (c) Future Technology in B School Education
 - (d) Devices for B School Education

9. Which of the following statements is NOT CORRECT as per the context of the given article?
 - (a) According to the writer of this article, future of technology in education is cloud.
 - (b) The writer sees various devices as the only future in education.
 - (c) Schools will need a fast robust internet connection for getting advantage of technology.
 - (d) The writer opines that device and other mobile technology are the 'now' and play a part in the future.

10. Choose the word which is **most similar** in meaning to the word: Robust
 - (a) Sturdy (b) roguish (c) roasting (d) rusting

Answers:

- | | | | | |
|------|------|------|------|-------|
| 1. c | 2. b | 3. c | 4. b | 5. d |
| 6. a | 7. a | 8. c | 9. b | 10. a |
