6 CLEAN WATER AND SANITATION

Ensure availability and sustainable management of water and sanitation for all

6.2.1: Water consumption tracking

We are receiving 4,00,000 Litres of water from Vellore corporation on Monthly basis. In addition to this we are also extracting water from open well and bore wells. We have connected water meters for the bore wells and open wells to measure the water intake, also we have connected flow meters at the STP inlet and measurement at the treater water outlet to monitor the amount water treated and re used for flushing purpose in our hostels, feed water of HVAC units, car wash and gardening purpose.

The water from various sources like open wells, bore well and corporation water are collected in the sump which is available across every building.
