JANUARY' 22

As the sparkling fireworks paved the way to the dawn of a new year, there is a rekindled hope in our hearts to start without fear.

Just like the warm sun on a chilly winter morning, a new beginning brings with it energy and comfort for all. It is the month of reflection, retrospection, and promises. As we hoist our flag with our heads held high, we pay homage to the soldiers who have made our country proud.

Holding onto our memories both sweet and sour, we keep moving forward until we meet.

Republic Day Fervour

HAPPY REPUBLIC DAY
INDIA
26 TH OF JANUARY

India observed its 73rd Republic Day on the 26th of January, 2022. The day marks the declaration of Purna Swaraj, back in 1930. It was also on this day that the Indian Constitution came into effect, under the leadership of Dr. B R Ambedkar. Proud to celebrate the anniversary of this event, VIT Vellore held a Republic Day ceremony coordinated by the Office of Students' Welfare, Events Management, Physical Education Department and Security Office, in the early hours of the day, while following social distancing norms.

This milestone beheld VIT's honorable Chancellor, G Viswanathan, Vice Presidents, Sankar Viswanathan and GV Selvam, Pro-Vice-Chancellor, Dr. S Narayanan, and Registrar K Sathiyarayanan in attendance as the Chief Guests of Honour and consisted of a small gathering of the university's staff members. Hon'ble Chancellor inaugurated the ceremony by hoisting the national flag high, following which the harmonious tunes of the National Anthem were sung by all while saluting the Tricolour and those in uniform paid tribute to it.

The gathering was addressed by our Chancellor who spoke about how far India as a country has come. He spoke of how we must prioritize education for all and poverty eradication.

He mentioned that by trying to make education more accessible, VIT aspires to be a model for society.

A stepping stone for the same is being recognised as an Institute of Eminence (IoE). He further added how the alumni of VIT have gone the extra mile to become leaders in their capacity and are exemplary citizens today. On an ending note, he gave his token of appreciation to all the teachers, staff members and students of VIT, wishing only more achievements and growth to follow. With this, the ceremony came to an end leaving everyone brimming with pride and devotion for the country.

Apart from this triumph, VIT NCC held recruitment to bring in another round of cadets to their contingent.

TALENT FORAGE

Those Men in Power

The strong ought to bear,
The responsibility of the weak, they say
Power is humane, they say
To stand between the tyrant and slave
Is their work they say
They say, they say and they say.

But their work robs us of courage,
We need through the day;
They parent terror and orphan
The efforts of our feeble endeavour
For their greed and lust,
Is our shame, our shame and our shame

Roll the dice, I say;
Freeze the hatred they spill, I say
Eat the mockery and stand up, I say;
Flame their conscience, I say
Straighten their wrong, I say
Win the battle of responsibility, I say
'VOTE', I SAY, 'VOTE', I SAY, 'VOTE', I SAY.

A Path Towards Temperance

In modern society, the Greek capital Athens is perhaps best known for being the birthplace of both democracy and western philosophy. Yet, the idea of free men (DEFINITELY no other gender) all equally involved in city happenings seemed to face opposition from those of intellectual inclination (sibling rivalry, anyone?). Philosophers were of the opinion that the common man should not be in charge of running a city. Indeed, the Athenian democratic rule tended to be swayed by a sufficiently skilled orator. While the days of direct rule are behind us, one must wonder whether the point still stands.

In a system where the average person views themselves as a passive observer, or at worst, a victim of modern governance, the path of least resistance is often apathy. Apathy towards the choice to vote, apathy towards the amount of misinformation surrounding elections, apathy towards the government, all stemming from a desire to not get involved. True apathy, however, is hard to maintain. So, the majority project an image of perpetual annoyance. Forever contemptuous towards the people in power. These are the perpetrators, nay, the torchbearers, of the pseudo-intellectual view that the only path left for the human race is that of despair, delinquency and dystopia.

Then there are those who follow the path of instant gratification. Those who listen to the call of their heart, the call for screaming, crying, perfect storms. They can make all the tables turn, or so they assure themselves if they stand up and fight. Sheer numbers are a force of nature in and of themselves. And how could anyone in this country possibly disagree with their individual opinions, which were based on their unique experiences and biases? Protests, riots, rage-fueled Instagram comments, these are the playthings of the incensed, oops sorry, the "emotionally driven".

Enclosed in a world of hyperactive activists and woo-woo "outliers of the Matrix", most children shove their fingers in their ears screaming LA LA LA the moment anyone breathes the word politics.

Then they grow up, form their own opinions, and feel ashamed of their passive attitude towards life during their formative years. They feel like they were enclosed in an echo-chamber labelled 'status quo'. Cue the extreme bitterness.

Funnily enough, if we examine our two factions closely, we see that they are not as different as they seem. One doesn't want to get cancelled on Twitter, the other doesn't want an empty Tumblr page. One is tired of speaking, the other is done with being spoken down to. One plays the role of a warner, the other, a warning. And if delve deep down into their psyche, we see that they are both fueled by fear; one, that nothing they do will ever make a difference, the other, that nothing will ever be the same if they don't do something.

With the globalisation of the right to vote, we seem to have forgotten the responsibility that comes with choosing our own representatives. Distancing oneself from duty might seem cool for a while, but to what end? At the same time, a decision that could potentially affect how our country is run requires level-headedness and critical thinking. A little subtlety wouldn't go amiss either.

Perhaps there exists a balance point. Perhaps an individual can exist without making their involvement in politics, or lack thereof, an integral part of their personality. After all, it must be possible to remain involved and aware of our governance without feeling the urge to participate in Every Single Debate online. We can all craft our own paths toward some semblance of temperance. Just saying.
