

Vellore Institute of Technology, Vellore

Admissions 2024

ABOUT THE PROGRAMME:

M.Arch. (Digital Technology in Buildings)

Shaping the digital evolution in the **Architecture Engineering and Construction (AEC)** field holds a key role.

Addressing the demand for inclusive planning and design has reshaped architects' perspectives on architectural solutions, urban challenges, and product innovations. Embracing a spectrum of modern tools, from AI to data-driven digital design and prototype creation, empowers architects not only to provide solutions but also to revolutionize the design process.

In the post-digital era, isn't the manner in which we design just as crucial as what we design? Let's contemplate.
