

Online Hands-on Workshop on DNA Sangers Sequencing Data Analysis

DNA sequencing is a technique used to determine the exact sequence of bases in a DNA molecule. With Next Generation Sequencing (NGS) sparks a revolution, sangers sequencing was the first developed and still being imperative for the better understanding of the gene and genome.

The virtual workshop covers the basic concept together with hands-on experience on sangers sequence data analysis and interpretation using Bio-Edit tool.

E-certificate will be given to the participants.
