Vellore Institute of Technology

(Deemed to be University under section 3 of UGC Act, 1956)

SCHOOL OF HOTEL AND TOURISM MANAGEMENT

Curriculum and Syllabus

B.Sc.

Catering & Hotel Management (2022-23)

VISION STATEMENT OF VELLORE INSTITUTE OF TECHNOLOGY

Transforming life through excellence in education and research

MISSION STATEMENT OF VELLORE INSTITUTE OF TECHNOLOGY

World class Education: Excellence in education, grounded in ethics and critical thinking for improvement of life.

Cutting edge Research: An innovation ecosystem to extend knowledge and solve critical problems.

Impactful People: Happy, accountable, caring and effective workforce and students.

Rewarding Co-creations: Active collaboration with national, international industries & universities for productivity and economic development

Service to Society: Service to the region and world through knowledge and compassion.

VISION STATEMENT OF THE SCHOOL OF HOTEL AND TOURISM MANAGEMENT

To be a global leader in preparing competent professionals in hospitality management to serve humanity

MISSION STATEMENT OF THE SCHOOL OF HOTEL AND TOURISM MANAGEMENT

To impart both practical and theoretical knowledge in every phase of Hotel, Catering and Hospitality Management

- To develop scientific attitude in students to serve better in hospitality industry.
- To inculcate habits of courtesy, discipline and hard work in students
- To impart an understanding of human nature to prepare skilled professionals.

PROGRAMME EDUCATIONAL OBJECTIVES (PEOs)

1. Excel in professional career and/or higher education by acquiring solid foundation in hospitality and tourism.
2. Apply knowledge of hospitality and tourism as well as core specialization to solve complex hotel management challenges.
3. Understand the fundamentals of the Hotel Industry, Commercial Kitchen operations, Front Office, Accommodation operation, Food & Beverage Service and the wines.
4. Exhibit professional and ethical standards, effective communication skills, teamwork spirit, multidisciplinary and trans-disciplinary approach for successful careers and to be able to compete globally, function as leaders, as entrepreneurs, and manage information efficiently and to engage in lifelong learning

PROGRAMME OUTCOMES (POs)

PO_1: Having a clear understanding of the subject related concepts and of contemporary issues.

PO_2: Having problem solving ability - solving social issues and technical problems.

PO_3: Having adaptive thinking and adaptability.

PO_4: Having a clear understanding of professional and ethical responsibility

PO_5: Having cross cultural competency exhibited by working in teams.

PO_6: Having a good working knowledge of communicating in English.

PO_7: Having interest in lifelong learning.

PROGRAMME SPECIFIC OUTCOMES (PSOs)

On completion of B. Sc. (Catering and Hotel Management) programme, graduates will be able to

PSO_1: Apply knowledge to find innovative solutions for hospitality problems.

PSO_2: Developing innovative processes, products, and technologies to meet the challenges in hospitality practices.

PSO_3: Exhibit leadership qualities and adapt to changing industrial settings.

Programme Core

BHM1702	FOUNDATION COURSE IN FOOD PRODUCTION	L	T	P	J	C
		2	0	8	0	6
Pre-requisite	NIL	Syllabus version				
		2.0				
Course Objectives:						
<ol style="list-style-type: none"> 1. To acquaint organizational structure of Food production department. 2. To learn cooking techniques, classification of Vegetable, Pigments, Fruits, Fats and oils. 3. To familiarize with flour and bread making. 						
Expected Course Outcomes :						
<ol style="list-style-type: none"> 1. Familiarized with kitchen hierarchy, equipment's and handling procedures 2. Identify raw materials, fruits and vegetables 3. Know about different methods of cooking 4. Can prepare stocks and sauces 5. Bake bread and cookies 6. Capable to re-use leftover food 						
Module:1	Culinary history and introduction to cookery	5 hours				
Development of the culinary art from the middle ages to modern cookery, Levels of skills and experiences, Attitudes and behaviour in the kitchen, Personal Hygiene, Uniforms & protective clothing. Small & large and mechanical equipment used in kitchen and Safety procedure in handling equipment. Origin of modern cookery.						
Module:2	Hierarchy area of department and kitchen	5 hours				
Classical Brigade, Modern staffing in various category hotels, Roles of Executive Chef, Duties and responsibilities of various chefs and Co-operation with other departments.						
Module:3	Aim & Objective of Cooking Food	4 hours				
Aims and objectives of cooking food, Various textures, Various consistencies, Techniques used in pre-preparation, Techniques used in preparation and Principles of a balanced and a healthy diet. Classification of Raising Agents, Role of Raising Agents, Actions and Reactions.						
Module:4	Methods of cooking food, Fats and Oils	4 hours				
Different methods of cooking, Rechauffe, Care and precautions to be taken and Selection of food for each type of cooking, Shortenings (Fats & Oils) – Role of Shortenings, Hydrogenation, Varieties of Shortenings, Advantages and Disadvantages of using various Shortenings. Modern methods of cooking – Sous-vide.						
Module:5	Stocks and Sauces	4 hours				
Definition of stock, Types of stock, Preparation of stock, Recipes, Storage of stocks and Uses of stocks, Classification of sauces, Recipes for mother sauces and its derivatives, Storage & precautions, Types of Thickening agents and Role of Thickening agents.						
Module:6	Bakery	3 hours				
Bakery: Organization, Equipment, Structure of wheat, Types of Wheat, Milling Process of Wheat, Types of Flour, Composition of Flour, Uses of Flour in Food Production , Characteristics of Good quality flour, Bread Making Process. Importance of each ingredient in bread making. Different methods of bread making,						

Module:7	Vegetable, fruits and egg cookery, Salads and dressings.	3 hours
Introduction & Classification of vegetables, pigment and colour changes, cuts of vegetables, Effects of heat on vegetables, Classification of fruits, and its uses. Egg cookery : Structure of an egg, Selection of egg, Uses of egg in cookery Salads : Classification and dressings.		
Module:8	lecture by Industry expert	2 hours
Total Lecture Hours		30 hours
Text Book(s)		
1.	Krishna Arora, Theory of cookery, Frank Bros &Co, Reprinted 2011	
2.	Gissle & Wayne, Professional Baking, Wiley Publishers, 2012	
Reference Books		
1.	David Foskett, Practical Cookery, Hodder Education, 13th edition, 2015	
2.	Thangam E. Philip, Modern Cookery Vol-I & Vol-II, Orient Black Swan, 6th Edition, Reprinted 2013	
List of Challenging Experiments		
At the end of the experiments, students will be able to cut vegetables, preparing stocks, sauces, soups, baking breads and cookies confidently.		
1.	Identification of equipment and its uses.	4 hours
2.	Identification of raw materials – (Indian / Continental) Kitchen etiquettes and hygiene.	4 hours
3.	Knife – Parts, Types and handling procedures	4 hours
4.	Cuts of vegetables	4 hours
5.	Various methods of cooking	6 hours
6.	Types of stock	4 hours
7.	Preparation of white and brown stock	8 hours
8.	Preparation of mother sauces and its derivatives	6 hours
9.	Egg cookery preparation and variety (boiled - soft and hard, fried(sunny side up, single fried, double fried egg) poached, scrambled, omelette, (plain, stuffed, Spanish).Encocote (Oeuf Benedictine.)	8 hours
10.	Simple salads (cole slaw, potato, beetroot, green and fruit salad.	4 hours
11.	Simple cookies(demonstration and preparation of Nankhatai, Melting moments, Chocó chip cookies, Vanilla cookies and short breads	4 hours
12.	Bread making: demonstration and preparation of White bread, Brown bread, Bread rolls, French bread and Brioche	4 hours
Total		60 hours
Mode of evaluation: Assignments, Mini projects and conducting practical exam.		
Recommended by Board of Studies	16-08-2017

Module:1	Basic Aspects of Nutrition	5 hours				
Definition of the terms Health, Nutrition and Nutrients, Classification of nutrients, Importance of Food– (Physiological, Psychological and Social function of food) in maintaining good health.						
Module:2	Energy	5 hours				
Definition of Energy and Units of its measurement(Kcal),Energy contribution from Macronutrients(Carbohydrates, Proteins and Fat),Factors affecting energy requirements, Concept of BMR, SDA, Concept of energy balance and the health hazards associated with Underweight and Overweight.						
Module:3	Macronutrients	4 hours				
Carbohydrates Definition, Classification(mono, di and polysaccharides),Dietary Sources, Functions Significance of dietary fibre(Prevention/treatment of diseases), Lipids Definition, Classification: Saturated and unsaturated fats, Dietary Sources, Functions, Significance of Fatty acids(PUFAs, MUFAs, SFAs, EFA) in maintaining health, Cholesterol –Dietary sources and the Concept of dietary and blood cholesterol, Deficiency diseases. Proteins Definition, Classification based upon amino acid composition, Dietary sources Functions, Methods of improving quality of protein in food (special emphasis on Soya proteins and whey proteins), Deficiency diseases.						
Module:4	Micronutrients	4 hours				
A. Vitamins Definition and Classification(water and fatssoluble vitamins), Food Sources, function and significance of: <ol style="list-style-type: none"> 1.Fat soluble vitamins (Vitamin A,D,E, K) 2.Water soluble vitamins (Vitamin C, Thiamine, Riboflavin, Niacin, Pyro toxin, Cyanocobalamin, Folic acid. B.MINERALS Definition and Classification(major and minor) Food Sources, functions and significance of :Calcium, Iron, Sodium, Iodine &Fluorine Deficiency diseases of Micro Nutrients.						

Module:5	Water	4 hours
Definition, Dietary Sources(visible, invisible) Functions of water, Role of water in maintaining health (water balance)		
Module:6	Balanced Diet	3 hours
Definition, Importance of balanced diet, RDA for various nutrients–Age, Gender, Physiological state,		
Module:7	Menu Planning	3 hours
Planning of nutritionally balanced meals based upon the three food group system Factors affecting meal planning, Critical evaluation of few meals served at the Institutes/Hotels based on the principle of meal planning. Calculation of nutritive value of dishes/meals, Balanced diet – Diabetic, Hypertension, Adult, and Sports personnel.		
Module:8	Guest lecture by Industrial Expert	2 hours
Total Lecture Hours		30 hours

BHM3020	FOOD SAFETY AND HYGIENE	L	T	P	J	C
		2	0	0	0	2
Pre-requisite	NIL	Syllabus version				
		1.0				
Course Objectives:						
<ol style="list-style-type: none"> To provide information on food safety and hygiene To familiarize the characteristics of micro organism To obtain the information of food laws and regulations 						
Expected Course Outcomes :						
<ol style="list-style-type: none"> To impart information on food safety and hygiene To know different preservative methods Analyse sanitation procedures Familiarize food borne diseases and its prevention To know the importance of food laws in the industry Acquire information on microorganism 						
Module:1						
Introduction					5 hours	
Basic introduction to food safety, food hazard, risks contamination and food hygiene.						
Module:2						
Food spoilage and food preservation					5 hours	
Types and causes of spoilage, sources of contamination, spoilage of different products, (milk and milk products cereal and cereal products, meat, fruits, vegetables and canned product. Basic principles of food preservation, method of preservation (high temperature, low temperature, drying, preservatives, and irradiation.						
Module:3						
Microorganisms in food					4 hours	
General characteristic of microorganisms based on their structure and occurrence. Factors affecting their growth in food. Common food borne disease bacteria, fungi, virus, parasites.						
Module:4						
Beneficial role of microorganism					4 hours	
Beneficial role of microorganism: fermentation and role of lactic acid and bacteria, fermentation in food(dairy foods, vegetable, Indian food, bakery products, and alcoholic beverages, miscellaneous (vinegar, and antibiotics.)						
Module:5						
Food borne disease					4 hours	
Types,(infection and intoxicants) Common diseases caused by food borne pathogens, preventive measures. Food contamination and adulterants: Introduction to food standards, types of food contaminants (pesticide, residues, Bacterialtoxins, mycotoxins, seafood toxins, metallic contaminants, residues from packing Material, common adulterants in food method of their method of their detection.(Basic Principle, and i FSSAI.						
Module:6						
Food laws and regulation					3 hours	
National- PFA essential commodities act(epo,mpo,etc.) International- codex, alumentarius, aso) Regulatory agencies –wto. Consumer protection act. Haccp (basic principle and implementation						
Module:7						
Hygiene and sanitation in food sector					3 hours	

General principles of food hygiene Ghp for commodities, equipment, work area, and personnel Cleaning and dis infection (method and agents commonly used in hospitality industry). Safety aspects of processing water Waste water and waste disposal. Recent trends: Emerging pathogens, genetically modified food labelling New trends in food packaging and technology. BSE(Bovine serum encephalopathy)
