

VIT[®]

Vellore Institute of Technology

(Deemed to be University under section 3 of UGC Act, 1956)

VIT SCHOOL OF DESIGN (V-SIGN)

B. Sc. (Multimedia and Animation)

Curriculum and Syllabus

(2020-2021 admitted students)

VISION STATEMENT OF VELLORE INSTITUTE OF TECHNOLOGY

Transforming life through excellence in education and research.

MISSION STATEMENT OF VELLORE INSTITUTE OF TECHNOLOGY

World class Education: Excellence in education, grounded in ethics and critical thinking, for improvement of life.

Cutting edge Research: An innovation ecosystem to extend knowledge and solve critical problems.

Impactful People: Happy, accountable, caring and effective workforce and students.

Rewarding Co-creations: Active collaboration with national & international industries & universities for productivity and economic development.

Service to Society: Service to the region and world through knowledge and compassion.

VISION STATEMENT OF VIT SCHOOL OF DESIGN (V-SIGN)

To be a school of repute for creating smarter world through excellence in education and research in the fields of Art, Design, and Media.

MISSION STATEMENT OF VIT SCHOOL OF DESIGN (V-SIGN)

- To create industry-ready designers through holistic training in the fields of Art, Design, and Media.
- To innovate newer methods of problem-solving in the field of design using state-of-the-art facilities.
- To produce confident professionals who will become trend-setters and leaders through their contributions to humanity and the earth's ecosystems.

B. Sc. (Multimedia and Animation)

PROGRAMME EDUCATIONAL OBJECTIVES (PEOs)

1. Graduates will function in their profession with social awareness and responsibility.

2. Graduates will interact with their peers in other disciplines in their work place and society and contribute to the economic growth of the country.
3. Graduates will be successful in pursuing higher studies in their chosen field.

B. Sc. (Multimedia and Animation)

PROGRAMME OUTCOMES (POs)

PO_01: Having a clear understanding of the subject related concepts and of contemporary issue.

PO_02: Having problem-solving ability solving social issues through design.

PO_03: Having a clear understanding of professional and ethical responsibility.

PO_04: Having cross-cultural competency exhibited by working in teams.

PO_05: Inculcating curiosity for lifelong learning about design.

PO_06: Having creativity and design thinking capability.

PO_07: Having virtual expression and digital foot printing ability.

B. Sc. (Multimedia and Animation)

PROGRAMME SPECIFIC OUTCOMES (PSOs)

On completion of B. Sc. (Multimedia and Animation) programme, graduates will be able to

- PSO1: To explore the fundamentals and underlying theories of Multimedia and animation to design and develop 2D/3D animations, film-making, visual effects for the creative media.
- PSO2: To innovate best practices for elements of design, virtual reality and gaming.

B. Sc. (Multimedia and Animation)

UNIVERSITY ELECTIVE (UE) – 6 credits

S.NO	COURSE CODE	COURSE TITLE	L	T	P	J	C
		University Elective - 1					
		University Elective - 2					

Course code		L	T	P	J	C
ENG1911	General English-I	1	0	2	0	2
Pre-requisite	Cleared EPT/English for Beginners	Syllabus version				
		1				
Course Objectives:						
<ol style="list-style-type: none"> 1. To synthesize information, analyze simple arguments, generate and express their own opinions on a limited range of technical as well as general-interest topics inside as well as outside the classroom. 2. To develop competencies in all the areas of LSRW skills 3. To speak and write in grammatically error-free English with the aid of active vocabulary. 						
Expected Course Outcome:						
<ol style="list-style-type: none"> 1. Develop communicative competence to express himself/herself in English in all challenging situations 2. Apply knowledge, ideas and concepts in the technicalities of proper pronunciation, Grammatical structure 3. Have better grasp over appropriate use and style of the English Language as well as the application areas of English communication 4. Write all types of official Letters/Emails used in the corporate world 5. Interpret text, diagram etc. which helps them in their academic as well as professional career. 						
THEORY						
Module:1	Grammar and Vocabulary					4 Hours
Grammatical & structural aspects covering -Types of sentences, Active & Passive Voice, Tenses, WH- Question Tags, Gerund, Auxiliaries & Modal Verbs, Preposition Vocabulary: Synonyms, Antonyms, Homonyms, Homophones Activity: Solving Worksheets of Grammar; Enhancing the knowledge of vocabulary through written interpretation and reading English newspapers/magazines						
Module:2	Text-based Analysis					6 Hours
Two short-stories-i) <i>A Tiger in the House</i> by Ruskin Bond; ii) <i>Real Time</i> by Amit Chaudhury Activity: Understanding sentence structures and enriching vocabulary by analyzing a text						
Module:3	Job-related Communication					3 Hours
Writing resumes, Job-application & Thank-you letters. Activity: An in-depth discussion on the different types of resumes, Job- application and Thank-you letters.						
Module-4	Reading Skills					2 Hours
Skimming, scanning, guessing unfamiliar words from context, understanding text organization, recognizing argument and counter-argument; distinguishing between main information and supporting detail, fact and opinion, hypothesis versus evidence; summarizing and note-taking Activity: Reading of Newspapers & Articles in the class						

PRACTICE SESSIONS		
Activity-1	Listening Comprehensions	4 hours
<p>Listening & Note Making: Short speeches/ news clips from Indian TV channels in English with interpretive questions Session: Summarizing/ note-making and drawing inferences</p>		
Activity-2	Introduction to Phonetics	4 hours
<p>Speech Sounds – Vowels and Consonants – Minimal Pairs- Consonant Clusters- Past Tense Marker and Plural Marker Session: Learning varied types of speech sounds</p>		
Activity-3	Public Speaking: Two Models	6 hours
<p>i) The interactional model of public speaking which includes encoding, decoding and feedback. ii) The transactional model of public speaking takes on a more mutual communication effort between the sender and receiver wherein both seek to find mutual meaning in the message. Session: The learners watch different videos on Public speaking and accordingly engage themselves in planning and preparing speeches that inform, persuade, or fulfill the needs of a special occasion.</p>		
Activity-4	Skit on Social issues / Debate	6 hours
<p>To highlight the use of functional English which helps the students to learn the usage of language in different occasions Session: Under the supervision of the Instructor and the audio-visual materials, the students will enact small skit on social issues and learn different expressions used for various situations like getting to know someone, introducing someone etc.; they will also hone their oratory power and argumentative skills by taking part in debates</p>		
Activity-5	Reading E-books through Intonation	4 hours
<p>Intonation refers to the way the reader varies the voice in tone, pitch, and volume to reflect the meaning of the text--sometimes called "expression." Session: Students learn to read E-books properly with the appropriate use of intonation</p>		
Activity-6	Information Transfer	6 hours
<p>Information transfer, or presenting verbal account of facts and processes in pictorial form and, conversely, changing Web-based graphic representations to writing, involves learning how to restate a given body of material in different ways. Session: The learners will be interpreting the information in different forms like tree diagrams, bar charts, pie charts</p>		

1.	Textbook/ Workbook		
	Wren & Martin, (Re-Printed 2018), <i>High School English Grammar & Composition</i> (Revised by Dr. N.D.V. Prasada Rao); New Delhi, S. Chand & Company Ltd.,		
Reference Books

2.	Aruna Koneru, (2015) <i>Professional Speaking Skills</i> , New Delhi, OUP.		
Mode of Evaluation: Quizzes, Presentations, Discussions, Role Play, Assignments and FAT.			
	List of Challenging Experiments (Indicative)		
1	Vocabulary building through reading a newspaper article		5 hours
2	Reading the prescribed text and writing a summary		10 hours
3	Writing a resume		5 hours
4	Listening to speeches/news clips and making inferences		5 hours
5	Public speaking		10 hours
6	Debates on current issues		10 hours
	Total Laboratory Hours		45 Hours
Mode of Evaluation: Quizzes, Presentations, Discussions, Role Play, Assignments and FAT.			
Recommended by Board of Studies		08.06.2019	
Approved by Academic Council		No. 55	Date 13-06-2019

Course code		L	T	P	J	C
ENG1912	General English-II	1	0	2	0	2
Pre-requisite	General English-I	Syllabus version				
		1				
Course Objectives:						
<ol style="list-style-type: none"> 1. To provide resources for the students to learn pronunciation of the English sounds through the knowledge of syllable-break-up and stress; and to know the advance level English grammar and vocabulary 2. To learn to appear for personal interview and to participate in Group Discussions 3. To develop the students' reading skills to enable them to skim an adapted text for main idea, to scan the text for specific information, to interpret and for inferences 						
Course Outcome:						
<ol style="list-style-type: none"> 1. Communicate effectively in medium level interview and group-discussions; 2. Develop the listening skills so as to understand and apply specific information from the source; 3. Use English appropriately in their professional and academic environment 4. Improve the Grammar writing skills to enable the students to respond to input provided through training so as to stimulate, to select and to summarize information in Technical Reports and apply acquired information to a specified task like Transcoding, writing letters etc. 5. Develop the overall personality and to hone the leadership qualities of the learners 						
THEORY						
Module:1	Advanced-level Grammar	5 hours				
Simple, Compound and Complex Sentences, Phrases-Adjective Phrases, Adverb Phrases, Noun Phrases, Direct and Indirect Speech, Conditionals, Concord, Punctuation Vocabulary building: Idioms Activity: Grammar Worksheet						
Module:2	Professional Dialogues	2 hours				
Formal Conversations – at the office with the CEO/ with the Registrar of a University/ Introducing oneself at an interview panel Activity: Role play [students practice short formal conversations in pairs/groups of 5-6]						
Module:3	Drafting	4 hours				
Notice, Circular, Resolution & Minutes, Business letter writing- Offer letter, quotation, status enquiry, Confirmation, Execution, Refusal and cancellation of order, recommendation, credit collection, claim, bank loan Activity: Worksheets						
Module:4	Text-based Analysis	4 hours				
<i>You Can Win</i> by Shiv Khera Activity: Skimming, scanning, guessing unfamiliar words from context; summarizing/note making & drawing inferences from the Text						

PRACTICE SESSIONS:		
Activity-1	Listening Comprehension for General Details	2 hours
Listening Comprehension Tests; Testing Exercises Session: Students will reflect back what they hear from the videos, which help them to be understood.		
Activity-2	Syllable structure; Word stress	4 hours
Structure of Syllables – Word Stress– Weak Forms and Strong Forms –Tone & Rhythm Session: Practicing basic rules of word accent - Stress shift - Weak forms and Strong forms- Sentence Stress		
Activity-3	Verbal & Non-Verbal Communication	6 hours
Exposure to videos of structured talks delivered by leaders across all domain - Presentation Skills- Non-verbal Communication Session: Students will make short speeches by watching relevant TED-Talk videos –PPT presentations by students communicating non-verbally in a pair/group		
Activity-4	Features of Good Conversation	4 hours
Strategies for effective Communication and the use of polite language through the aid of audio-visual materials. Session: Making requests and seeking permissions, Telephone etiquette, Participating in Case-study based Group Discussions		
Activity-5	Report Writing & Transcoding	8 hours
Report writing format; Essential qualities of technical writing; Data interpretation & Transcoding; logical and analytical reasoning questions Session: Students write a Report; they interpret graphs of medium level difficulty		
Activity-6	Leadership Development	6 hours
The focus will be on individual, group and organization factors associated with leadership. Session: Students will be acquainted with the development of the conception of leadership and in the process would hone their vocabulary and conversational power, by watching videos of leaders delivering Lectures; Seminars conducted by Administrative Heads of various Schools/ Departments within the University.		
		Total Practical hours: 45 hours
Text Book/ Work Book

Course code		L	T	P	J	C
ENG1913	Effective Communication Skills	1	0	2	0	2
Pre-requisite	General English-II	Syllabus version				
		v.1				
Course Objectives:						
<ol style="list-style-type: none"> 1. To be an independent/ a competent speaker in all areas of written and spoken communication for successful business/ professional interactions. 2. To organize, compare and contrast, categorize and describe complex content. 3. To speak and write with fluency and confidence, with minor grammatical errors and with a fairly wide active vocabulary. 						
Course Outcome:						
<ol style="list-style-type: none"> 1. Acquire an effective command over the language, though with minor inaccuracies 2. Understand complex theories of varied subjects and understand detailed logic & reasoning 3. Perform well in middle to upper-end placement interviews/ competitive exams/ general social situations 4. Participate actively and independently in seminars/discussions 5. Understand the requisite proficiency for difficult/ varied levels of communications in BBC/UK & CNN/US accents 						
THEORY						
Module:1	Verbal-Logic & Reasoning	4 hours				
Verbal reasoning tests assess the learner's understanding and comprehension skills. Activity: Interpreting short texts.						
Module:2	The Art of Paraphrasing	2 hours				
A restatement of the meaning of a text or passage using other words. Activity: Paraphrasing different articles & Research papers						
Module:3	Text-based Analysis	6 hours				
<i>The Thousand Faces of Night</i> by Githa Hariharan Activity: Summarizing/ note making & drawing inferences from the text						
Module:4	Research Paper Writing	3 hours				
Structure of a Research paper; Plagiarism Activity: Practice on Research Paper writing.						
PRACTICE-SESSIONS						
Activity-1	Vocalics	4 hours				
The learners will undergo training in vocalics which are rate, or speed at which the person speaks, pitch, inflection and variety in the voice, volume, being loud or soft, and articulation and pronunciation, or how correctly and clearly the person speaks. Session: Type the learners will undergo training in vocalics						
Activity-2	Travel blogs / E-Travel Diary	6 hours				
Briefing on the art of writing travel blogs. Session: The learners will engage in writing relevant blogs						
Activity-3	Video-conference and Interview	8 hours				
Preparing the students for Interviews. Session: Students will participate in mock-Interviews and real-time video-conference						

Activity-4	Language Sensitivity & Cross Cultural Communication	4 hours
Meaning & importance of Cross Cultural Communication; Understanding Inter and Cross-Cultural Communication Nuances through relevant videos & case-studies Session: Students will attempt a case study on cross-cultural communication		
Activity-5	Mass-Media Communication	2 hours
Briefing on the constituents of mass media such as newspapers, magazines, films/documentaries, radio, television, the mechanism of conveying information to a mass-audience and an academic investigation of the different methods of mass correspondence Activity: An advanced understanding of news media and their role in the society and relevant media education through the mode of note-making & interpretive exercises		
Activity-6	Writing Abstract/Summary/Articles	6 hours
Equip participants with skills in writing and presenting effective and successful Abstract/ Summary. The participants will also acquire skills in writing quality Articles which can engage the audience. Session: Each individual student will submit an Article under the guidance of the course-Instructor		
		Total Lecture hours:
		45 hours

MMA1007	ROLE OF MEDIA IN ENVIRONMENTAL STUDIES	3	0	0	0	3
Pre-requisite	NIL	Syllabus version				
Course Objectives:						
The course is aimed :						
<ol style="list-style-type: none"> 1. To motivate the students about the media role in environmental studies. 2. At students gaining experience in personally and collectively engaging the creative process. 3. To understand and rectify the problems faced by the environment. 						
Expected Course Outcome:						
At the end of the course the student should be able to :						
<ol style="list-style-type: none"> 1. Implement the media knowledge on society, environment, culture, broadcasting and media. 2. Understand the knowledge of natural resources, social issues and bio-diversity. 3. Expand the knowledge about the concepts related to media 4. Be aware of social implications, media exposure and its uses in globalization among media audiences. 5. Gain knowledge on global culture and media operations 						
Module:1	Media and environmental studies	6 hours				
The multi- disciplinary nature of environmental studies - Definition, scope, importance, need for public awareness – Role of media in sensitizing the people – The need for proper investigation – significance of World Environment Day – Earth Day etc.						
Module:2	Natural Resources	6 hours				
Natural Resources – forest resources – use, exploitation, deforestation, construction of multipurpose dams – effect on forests, Water resources – use of surface and subsurface water; effect of floods, drought, water conflicts, food resources – food problems, advantage and disadvantage of fertilizers & pesticides, effect on environment						
Module:3	Energy Resources	6 hours				
Need to develop renewable energy, land resources – Land degradation, landslides, soil erosion, desertification & case studies						
Module:4	Social Issues and the environment	6 hours				
Urban problems related to energy & sustainable development, water conservation, rain water harvesting, watershed management, problems related to rehabilitation – case studies, Wasteland reclamation, Consumerism and waste products - Environment Protection Act, Air, Water, Wildlife, Forest Conservation Act, Environmental legislation and public awareness.						
Module:5	Media in Ecology conservation:					
Concept of ecosystem, structure & function of an ecosystem, ecological succession, food chains, food webs and ecological pyramids. Problems related to energy – Water conservation – Climate change and global warming – Environment protection Act – Air (Prevention and control of pollution) Act.						
Module:6	Bio diversity	6 hours				

Definition, genetic, species and ecosystem diversity, bio-geographical classification of India, hotspots, threats related to habitat loss, poaching of wildlife, man-wildlife conflicts, Conservation of bio- diversity – Wildlife Protection Act.			
Module:7 Media in Human population 7 hours			
Population growth, variation among nations, Population explosion – Family Welfare Programme, Environment and human health, Human Rights, Value Education, HIV/ AIDS, Women and Child Welfare, Role of Information Technology – Visit to local polluted site / Case Studies. Customer Orientation – retention - QFD – CSM – TQM Models – Case Studies.			
Module:8 Guest Lecture 2 hours			
Expert talk on the recent trends of media role in environmental studies.			
		Total Lecture hours:	45 hours
Text Book(s)			
1.	V. K. Ahluwalia " Environmental Studies: Basic Concepts", The Energy and Resources Institute (TERI), 2012.

HUM1032	Ethics and Values	2	0	0	0	2
Pre-requisite	Nil	Syllabus version				
Course Objectives:						
<ul style="list-style-type: none"> To understand and appreciate ethical issues facing an individual, profession, society and polity. To understand the negative health impacts of certain unhealthy behaviors. To appreciate the need and importance of Physical, Emotional Health and Social Health Exposes to non-traditional violent and nonviolent crimes that have significant physical, fiscal, and social costs. 						
Expected Course Outcome:						
<ol style="list-style-type: none"> 1. Make better lifestyle choices to increase your health and wellness for life. 2. Ability to follow sound morals and ethical values scrupulously to prove as good citizens 3. Understand how a habit becomes an addiction; its effects and prevention. 4. Understand the negative health impacts of certain unhealthy behaviours. 5. Identify and portray ethical behaviours and values consistent with the health. 6. Identify ethical concerns in research and intellectual contexts, including academic integrity, use and citation of sources, the objective presentation of data, and the treatment of human subjects. 7. Identify the main typologies, characteristics, activities, actors and forms of cybercrime. 						
Module:1	Being good and responsible	5 hours				
Gandhian values such as truth and non-violence – comparative analysis on leaders of past and present – society’s interests versus self-interests						
Personal Social Responsibility: Helping the needy, charity and serving the society.						
Module:2	Social Issues 1	4 hours				
Harassment – types - Prevention of harassment, violence and terrorism						
Module:3	Social Issues 2	4 hours				
Corruption: ethical values, causes, impact, laws, prevention – electoral malpractices						
white collar crimes - tax evasions – unfair trade practices						
Module:4	Addiction and Health	3 hours				
Peer pressure - Alcoholism: ethical values, causes, impact, laws, prevention – Ill effects of smoking						
- Prevention of Suicides						
Sexual Health: Prevention and impact of pre-marital pregnancy and Sexually Transmitted Diseases						

Module:5	Drug Abuse	4 hours	
Abuse of different types of legal and illegal drugs: ethical values, causes, impact, laws and prevention			
Module:6	Personal and Professional Ethics	3 hours	
Dishonesty - Stealing - Malpractices in Examinations – Plagiarism			
Module:7	Abuse of technologies	4 hours	
Hacking and other cyber crimes, addiction to mobile phone usage, video games and social networking websites			
Module:8	Invited Talk: Contemporary Issues	3 hours	
		Total Lecture hours:	30hours

Approved by Academic Council		No. 47	Date 5-10-2017

Course code	Course title	L	T	P	J	C
MMA3098	Comprehensive Exam	0	0	0	0	2
Pre-requisite	Nil	Syllabus version 1.0				
Course Objectives:						
<ol style="list-style-type: none"> 1. To re-iterate and explore the basic concepts emphasized in core multimedia courses 2. To provide a holistic view about the core and advanced animation principles 3. To explore the application avenues for the Multimedia and Animation concepts. 						
Expected Course Outcomes:						
<ol style="list-style-type: none"> 1. Demonstrate knowledge of the fundamental requirement of Art and design. 2. Demonstrate basic graphics and web design techniques. 3. Explore the modelling and lighting concepts 4. Mastering the concepts of digital cinematography. 5. Understand the concept of various visual effects and compositing techniques. 						
Module:1	ART AND DESIGN					
Line of action, balance – different poses – stick figure – male & female with measurement – figure drawing basics – Essentials of human figure drawing – proportion and gesture - Perspective view – importance – terminology – horizon line / eye level – vanishing point – viewpoint – orthogonal line – ground line – picture plane – types of perspective views – aerial vs. linear – types of linear perspective – one point perspective – two point perspective – three point perspective – bird’s view & warms view - Cartooning – types of cartoons – political/editorial, gag cartoons, illustrative cartoons, cartoon strips, animated cartoons – methodical development of a cartoon – head types – eyes – noses – mouths – ears – hands and feet – body types and proportions – cartoon character object – various action poses						
Module:2	GRAPHIC & WEB DESIGN TECHNIQUES					
Basics of Adobe Photoshop - Logo – Business Card – Flyer – Poster – Adobe Illustrator – Tools & Techniques - Analysis research – concept development – design sketching – content integration – Brochure Design – Magazine Design – Package Design – Tools & Techniques - Adobe Dreamweaver - Adobe Photoshop – Single Page Website –Planning – Navigation Bar - Tools & Techniques - HTML skeleton - HTML tags for text, links, lists - HTML tags and web standards for images - Simple layouts - Complex layouts - HTML tags for layout - HTML tags for tables & styles - Internal & External CSS style sheets - Responsive website – static webpage – dynamic webpage.						
Module:3	MODELING AND LIGHTING					
Maya Interface: introduction to user interface –working in 3D – views – cameras –the Maya workspace - saving your work – creating manipulating and moving objects – perspective and orthographic windows – creating curves – editing curves – attaching and detaching curves - Types of curves, types of surfaces, editing nurbs surfaces, Boolean, stitch, isoparm displacement, trimming a nurbs surface, filleting nurbs surface , Modeling: using Nurbs curves to create a model – creating table - Creating interior –subdivision surfaces –shoulder setup –Using extrude – creating a new layer–Using the cut faces tool – convert subdivision surfaces to polygon – using the Mesh – Smooth option – using split polygon tool – using the Mesh - Combine option – using Merge Edges option – using the subdivide proxy option – using the Mesh - Extract option – using Move tool –						

using the merge edge tool , creating interior and exterior, modeling various types of props for interior and exterior, creating an urban(village)

Module:4 | Digital Cinematography

Various types of Camera; Film Types; Pioneers of Photography; Pioneers of Cinematography; Various Editing techniques; Early Cinema; Film Camera Types; Film Projection; Sound for Cinema; Dolby technologies; Sound Perception & Visualization; Microphones types and Uses. - Lighting for Photography; Light Meter; Types of lights for Still Photography; Day shoot reflectors handling - using different filters avoiding the over light – day time low light handling – night low light handling different lenses – indoor setting up the light and using wide angle camera; - Camera angles – camera movement - camera blocking – different types of cameras and features (digital and analog) – different types of lenses (wide angle, tele lenses)– tripod handling – track and dolly – different types of lens and filters – matte box

Module:5 | VFX & Compositing

History of VFX – VFX vs. SFX- Evolution of VFX – Recent and current trends of VFX in Film Industry- Types of VFX soft wares- layer based – node based – File Formats for VFX - Applications of softwares – previewing files – opening a workspace – examine the composite – make changes to the composite – the schematic view – repositioning interface elements – creating simple composites: comparing 3D and 2D option – using operators in a composite – color correcting – use the histogram to improve the matte – adjust the colour suppression curves - Compositing tools and properties – types of compositing – 3d compositing - live action compositing – stages of compositing –FG and BG matching colour- shadows – lighting

MMA3099	Capstone Project			L	T	P	J	C
				0	0	0	0	12
Pre-requisite				Syllabus version				
				v. 1.0				
Course Objectives:								
To provide sufficient hands-on learning experience related to the design and develop suitable model / show reel so as to enhance the technical skill sets in the chosen field.								
Expected Course Outcome:								
At the end of the course the student will be able to								
<ol style="list-style-type: none"> 1. Formulate specific problem statements for ill-defined real life problems with reasonable assumptions and constraints 2. Perform literature search and / or patent search in the area of interest 3. Develop a suitable solution methodology for the problem 4. Conduct experiments / Design & Analysis / solution iterations and document the results 5. Document the results in the form of technical report / presentation 								
Contents								
<ol style="list-style-type: none"> 1. Capstone Project includes Visual effects show reel, character designing, 2D/ 3D game designing, Graphics designing, 2D / 3D animation show reel, Motion graphics, short film making. 2. Project can be for 5 months duration based on the completion of required number of credits as per the academic regulations. 3. Should be carried out individually except short film making. A team of 3 members are permitted. 4. Project can be carried out inside or outside the university, in any relevant industry. 5. Publishing their work / portfolio will be an added advantage. 								
Mode of Evaluation: Periodic reviews, Presentation, Final oral viva, Porfolio submission								
Recommended by Board of Studies				12.6.2015				
Approved by Academic Council				No. 37		Date		16.6.2015

Course code	Course Title		L	T	P	J	C
MAT1006	Mathematics for Media Studies		3	0	0	0	3
Pre-requisite	None		Syllabus version				
							1.0
Course Objectives(CoB):1,2,3							
The course is aimed at							
<ol style="list-style-type: none"> 1. Enhancing the basic understanding of application of mathematics for media studies. 2. Imparting design thinking capability to build multimedia systems 3. Developing design skills of mathematical modelling for media applications. 							
Course Outcome(CO): 1,2,3,4,5							
At the end of the course the student should be able to							
<ol style="list-style-type: none"> 1. Apply Matrix Factorizations in Multimedia encoding 2. Apply Matrix Theory in Multimedia data 3. Understand codecs and their uses 4. Utilise dimensionality reduction techniques for compression 5. Introduce Multimedia software packages and libraries 							
Module:1	Number System	5 hours					
Binary Number System, Signed and Unsigned Binary Numbers, Binary Arithmetic, Octal and Hexadecimal numbers, Conversion among bases, Modulo Arithmetic, quasi inverse of integers, prime numbers, prime factorization, Euclid's algorithm, other algorithms for GCD and LCM							
Module:2	Matrix Theory	6 hours					
Introduction to Matrices, Types of Matrices, Determinants, Properties, Rank of a Matrix, Inverse Matrix, Gauss Elimination, Solutions of System of linear equations, Eigen Values and Eigen Vectors							
Module:3	Vector Spaces	6 hours					
Vector Space Definition, Subspace, Rank and Dimension of the Vector Space, Linear Transformations, Matrix Representations of Linear Transformation, Applications of Linear Transformation in Multimedia.							
Module:4	Analytical Geometry 2D/3D	8 hours					
Two dimensional geometric transformations, Three dimensional geometric and modeling transformations, Translation, Rotation, Scaling, composite transformations in 2D and 3D, Orthogonal Matrix representations and homogeneous coordinates, Rectangular, spherical-polar and cylindrical co-ordinates, Directional cosines, Lines, Spheres							

Module:5	Descriptive Statistics	7 hours	
Types of Data, Central tendency measures: mean, median and mode, Measures of Dispersion, Range, Quartile deviation, Mean Deviation, Variance and standard deviation. Correlation and Regression, Sampling Techniques			
Module:6	Redundancy and Information in Multimedia	6 hours	
Coding in multimedia, Encoding and Decoding Multimedia data, Data formats, Code words, Hamming codes, Checksums, mod-2 polynomials, irreducibility, advanced redundancy checks			
Module:7	Multimedia software	5 hours	
Multimedia codecs, open-source libraries, Python packages for multimedia, incorporating Multimedia data in web sites, state-of-art packages from various vendors for PC, smartphone.			
Module:8	Expert Lecture	2 hours	
Multimedia packages and libraries			
	Total Lecture hours:	45 hours	
Text Book(s)			
1.	Mathematics for Computer Graphics, John Vince, Springer Verlag, 5th Edition (2017)		
2.	Introduction to Applied Linear Algebra – Vectors, Matrices, and Least Squares, Stephen Boyd and Lieven Vandenberghe, Cambridge U Press (2018).		
3.	Mathematics for Multimedia, M. Victor Wickerhauser, Birkhaeuser Verlag, (2009)		
Reference Books			
1	Elementary Linear Algebra, Eton Howard, Wiley India 2016		
2	Introduction to Linear Algebra, Gilbert Strang, 5th ed., Cengage Learning		
Mode of Evaluation: CAT / Assignment / Quiz / FAT / Project / Seminar			
	Recommended by Board of Studies	24 th June 2020	
	Approved by Academic Council	No. 59	Date 24 th Sep 2020

Course code		L	T	P	J	C
STS 1111	Introduction to Soft skills	3	0	0	0	1
Pre-requisite	None	Syllabus version				
		1				
Course Objectives:						
<ol style="list-style-type: none"> 1. To enhance critical thinking and innovative skills 2. To have working knowledge of communicating in English 3. To have critical thinking and innovative skills 						
Expected Course Outcome:						
At the end of the course student should be able to						
<ol style="list-style-type: none"> 1. Students will be able to exhibit appropriate presentation skills 2. Students will be able to exhibit appropriate analytical skills 3. The students will be able to deliver impactful presentations 						
Module:1	Lessons on excellence	10 hours				
Ethics and integrity						
Importance of ethics in life, Intuitionism vs Consequentialism, Non-consequentialism, Virtue ethics vs situation ethics, Integrity - listen to conscience, Stand up for what is right						
Change management						
Who moved my cheese?, Tolerance of change and uncertainty, Joining the bandwagon, Adapting change for growth - overcoming inhibition						
How to pick up skills faster?						
Knowledge vs skill, Skill introspection, Skill acquisition, "10,000 hours rule" and the converse						
Habit formation						
Know your habits, How habits work? - The scientific approach, How habits work? - The psychological approach, Habits and professional success, "The Habit Loop", Domino effect, Unlearning a bad habit						
Analytic and research skills.						
Focused and targeted information seeking, How to make Google work for you, Data assimilation						
Module:2	Team skills	11 hours				
Goal setting						
SMART goals, Action plans, Obstacles -Failure management						
Motivation						
Rewards and other motivational factors, Maslow's hierarchy of needs, Internal and external motivation						
Facilitation						
Planning and sequencing, Challenge by choice, Full Value Contract (FVC), Experiential learning cycle, Facilitating the Debrief						
Introspection						
Identify your USP, Recognize your strengths and weakness, Nurture strengths, Fixing weakness, Overcoming your complex, Confidence building						
Trust and collaboration						
Virtual Team building, Flexibility, Delegating, Shouldering responsibilities						

Module:3	Essential English Grammar	12 hours
<ul style="list-style-type: none"> • Nouns and Pronouns • Verbs • Subject-Verb Agreement • Pronoun-Antecedent Agreement • Punctuations • Prepositions • Adjectives and Adverbs • Forms and Speech and Voice • Collocations, Gerund and Infinitives 		
Module:4	Adaptability	12 hours
<p>Theatrix Motion Picture, Drama, Role Play, Different kinds of expressions</p> <p>Creative expression Writing, Graphic Arts, Music, Art and Dance</p> <p>Flexibility of thought The 5'P' framework (Profiling, prioritizing, problem analysis, problem solving, planning)</p> <p>Adapt to changes(tolerance of change and uncertainty) Adaptability Curve , Survivor syndrome</p>		
Total Lecture hours:		45 hours
Text Book(s)		
1.	<u>Chip Heath</u> , <u>How to Change Things When Change Is Hard (Hardcover)</u> , 2010, First Edition, Crown Business.	
2.	<u>Karen Kindrachuk</u> , <u>Introspection</u> , 2010, 1 st Edition.	
3.	<u>Karen Hough</u> , <u>The Improvisation Edge: Secrets to Building Trust and Radical Collaboration at Work</u> , 2011, Berrett-Koehler Publishers	
Reference Books

2.	Raymond murphy, <u>English essential grammar</u> , 2000, Cambridge University Press.	
Mode of Evaluation: FAT, Assignments, Projects, Case studies, Role plays,3 Assessments with Term End FAT (Computer Based Test)		

Course code		L	T	P	J	C
STS 1112	Introduction to Etiquette	3	0	0	0	1
Pre-requisite	None	Syllabus version				
		1				
Course Objectives:						
<ol style="list-style-type: none"> 1. To develop the students' logical thinking skills 2. To learn the strategies of solving quantitative ability problems 3. To enrich the verbal ability of the students 4. To enhance critical thinking and innovative skills 						
Expected Course Outcome:						
<p>At the end of the course student should be able to</p> <ol style="list-style-type: none"> 1. Use relevant aptitude and appropriate language to express themselves 2. Communicate the message to the target audience clearly 3. Be proficient in solving quantitative aptitude and verbal ability questions of various examinations effortlessly 						
Module:1	Study skills	10 hours				
<p>Memory techniques Relation between memory and brain, Story line technique, Learning by mistake, Image-name association, Sharing knowledge, Visualization</p> <p>Concept map Mind Map, Algorithm Mapping, Top down and Bottom Up Approach</p> <p>Time management skills Prioritization - Time Busters, Procrastination, Scheduling, Multitasking, Monitoring 6. Working under pressure and adhering to deadlines</p>						
Module:2	Emotional Intelligence - I	6 hours				
<p>Transactional Analysis Introduction, Contracting, Ego states, Life positions</p> <p>Brain storming Individual Brainstorming, Group Brainstorming, Stepladder Technique, Brain writing, Crawford's Slip writing approach, Reverse brainstorming, Star bursting, Charlette procedure, Round robin brainstorming</p>						
Module:3	Business Etiquette	9 hours				
<p>Social and Cultural Etiquette Value, Manners, Customs, Language, Tradition</p> <p>Writing Company Blogs Building a blog, Developing brand message, FAQs', Assessing Competition</p> <p>Internal Communications Open and objective Communication, Two way dialogue, Understanding the audience</p> <p>Planning</p>						

Identifying, Gathering Information, Analysis, Determining, Selecting plan, Progress check, Types of planning		
Writing press release and meeting notes		
Write a short, catchy headline, Get to the Point –summarize your subject in the first paragraph, Body – Make it relevant to your audience		
Module:4	Quantitative Ability	4 hours
Numeracy concepts		
Fractions, Decimals, Bodmas, Simplifications, HCF, LCM, Tests of divisibility		
Math Magic		
Puzzles and brain teasers involving mathematical concepts		
Speed Calculations		
Square roots, Cube roots, Squaring numbers, Vedic maths techniques		
Module:5	Reasoning Ability	3 hours
Interpreting Diagramming and sequencing information		
Picture analogy, Odd picture, Picture sequence, Picture formation, Mirror image and water image		
Logical Links		
Logic based questions-based on numbers and alphabets		
Module:6	Verbal Ability	3 hours
Strengthening Grammar Fundamentals		
Tenses		
Reinforcements of Grammar concepts		
Conditional sentences and If clauses.		
Module:7	Communication and Attitude	10 hours
Writing		
Writing formal & informal letters, how to write a blog & knowing the format, Effective ways of writing a blog, how to write an articles & knowing the format, Effective ways of writing an article, Designing a brochure		
Speaking skills		
How to present a JAM, Public speaking		
Self managing		
Concepts of self management and self motivation, Greet and Know, Choice of words, Giving feedback, Taking criticism		
Total Lecture hours:		45 hours

Text Book(s)	
1.	FACE, Aptipedia, Aptitude Encyclopedia, 2016, First Edition, Wiley Publications, Delhi.
2.	ETHNUS, Aptimithra, 2013, First Edition, McGraw-Hill Education Pvt. Ltd.
Reference Books	
1.	Alan Bond and Nancy Schuman, 300+ Successful Business Letters for All Occasions, 2010, Third Edition, Barron's Educational Series, New York.

STS 2111	Basic problem solving skills	3	0	0	0	1
Pre-requisite	None	Syllabus version				
		1				
Course Objectives:						
<ol style="list-style-type: none"> 1. To enhance critical thinking and innovative skills 2. To have working knowledge of communicating in English 3. To have critical thinking and innovative skills 						
Expected Course Outcome:						
At the end of the course the student should be able to						
<ol style="list-style-type: none"> 1. Exhibit appropriate analytical skills 2. Exhibit appropriate presentation skills 3. Demonstrate the ability to resolve problems that occur in their field. 4. Basic concepts of Quantitative Aptitude, Logical reasoning and Verbal ability 						
Module:1	Social Interaction and Social Media	6 hours				
Effective use of social media						
Types of social media, Moderating personal information, Social media for job/profession, Communicating diplomatically						
Networking on social media						
Maximizing network with social media, How to advertise on social media						
Event management						
Event management methods, Effective techniques for better event management						
Influencing						
How to win friends and influence people, Building relationships, Persistence and resilience, Tools for talking when stakes are high						
Conflict resolution						
Definition and strategies , Styles of conflict resolution						
Module:2	Non Verbal Communication	6 hours				
Proximecs						
Types of proximecs, Rapport building						
Reports and Data Transcoding						
Types of reports						
Negotiation Skill						
Effective negotiation strategies						
Conflict Resolution						
Types of conflicts						
Module:3	Interpersonal Skill	8 hours				
Social Interaction						

Interpersonal Communication, Peer Communication, Bonding, Types of social interaction			
Responsibility			
Types of responsibilities, Moral and personal responsibilities			
Networking			
Competition, Collaboration, Content sharing			
Personal Branding			
Image Building, Grooming, Using social media for branding			
Delegation and compliance			
Assignment and responsibility, Grant of authority, Creation of accountability			
<hr/>			
Module:4	Quantitative Ability		6 hours
Number properties			
Number of factors, Factorials, Remainder Theorem, Unit digit position			
Averages			
Averages, Weighted Average			
Percentages			
Increase & Decrease or successive increase			
<hr/>			
Module:5	Reasoning Ability		8 hours
Analytical Reasoning			
Blood Relations, Ordering/ranking/grouping, Puzzle test, Selection Decision table			
Rebus Puzzles/Problem Solving			
More than one answer, Unique ways			
<hr/>			
Module:6	Building personal lexicon		6 hours
Benefits of becoming a Logophile			
Etymology – Root words			
Prefix and suffix			
Cue card technique			
Mnemonic technique of learning words			
Word games			
Module: 7	Emotional Intelligence - II		5 hours
Empathy			
Affective Empathy and Cognitive Empathy			
Sympathy			
Level of sympathy (Spatial proximity, Social Proximity, Compassion fatigue)			
Psychometric Analysis			
Skill Test, Personality Test			
		Total Lecture hours:	45 hours

At the end of the course student should be able to						
<ol style="list-style-type: none"> 1. Demonstrate the ability to resolve problems that occur in their field. 2. To communicate the message to the target audience clearly 3. Basic concepts of Quantitative Aptitude, Logical reasoning and Verbal ability 						
Module:1	Impression Management	8 hours				
Types and techniques						
Importance of impression management, Types of impression management, Techniques and case studies, Making a good first impression in an interview (TEDOS technique) , How to recover from a bad impressions/experience, Making a good first impression online						
Non-verbal communication and body language						
Dressing, Appearance and Grooming, Facial expression and Gestures, Body language (Kinesics), Keywords to be used, Voice elements (tone, pitch and pace)						
Module:2	Thinking Skills	4 hours				
Introduction to problem solving process						
Steps to solve the problem, Simplex process						
Introduction to decision making and decision making process						
Steps involved from identification to implementation, Decision making model						
Module:3	Beyond Structure	4 hours				
Art of questioning						
How to frame questions, Blooms questioning pyramid, Purpose of questions						
Etiquette						
Business, Telephone etiquette, Cafeteria etiquette, Elevator etiquette, Email etiquette, Social media etiquette						

Module:4	Quantitative Ability	9 hours
Profit and Loss Cost Price & Selling Price, Margins & Markup Interest Calculations Simple Interest, Compound Interest, Recurring Time and Work Pipes & Cisterns, Man Day concept, Division Wages		
Module:5	Writing and Non-verbal skills	11 hours
Email writing Email writing structures, Request and apology mails. Note making What is note making, Different ways of note making Report writing What is report writing, how to write a report, Writing a report & work sheet Product description Designing a product, understanding its features, Writing a product description Research paper Research and its importance, Writing sample research paper Non-Verbal Communication Haptics, Oculistics, Paralanguage, Semiotics, Chronemics, Artifactual Communication		
Module:6	Verbal Ability	9 hours
Grammar Spot the Errors, Sentence Correction, Gap Filling Exercise, Sentence Improvisations, Misc. Grammar Exercise		
	Total Lecture hours:	45 hours

STS 3113	Preparedness for Recruitment	3	0	0	0	1
Pre-requisite	None	Syllabus version				
		1				
Course Objectives:						
<ol style="list-style-type: none"> 1. To solve Verbal Ability questions of easy to intermediate level 2. To learn the art of negotiation and practice the strategies and skills that will help them become successful negotiator. 3. To learn and practice the etiquettes which will be helpful to enrich their professionalism. 						
Expected Course Outcome:						
At the end of the course student should be able to						
<ol style="list-style-type: none"> 1. Interact confidently and use decision making models effectively 2. Deliver impactful presentations 3. Be proficient in solving quantitative aptitude and verbal ability questions effortlessly 						
Module:1	Negotiation skills	18 hours				
Should I negotiate? – The art of negotiation Pre-negotiation preparation Position based and Interest based negotiation A dispute resolution or deal making negotiation Using decision tress Handling ethical issues Using power in negotiation Tactics to increase the bargaining power Developing mental and emotional strength Using the psychological tools Formal and Informal negotiations Understanding the Perspectives Dispute prevention ADR Concepts Understanding how personal biases and cultural differences impact negotiations Achieving win-win outcomes Styles of negotiation Successful negotiation – Essential and effective skills and strategies Conflict resolution – Types of conflicts Difficulties in negotiations – The conflict trap						
Module:2	Verbal Ability	10 hours				
Vocabulary Building						
Synonyms & Antonyms, Idioms, Sentence completion, Analogies,						
Comprehension and Logic						

Reading comprehension Para Jumbles Critical Reasoning Premise and Conclusion, Assumption & Inference, Strengthening & Weakening an Argument. Sentence Correction Modifiers, parallelism, Verb time sequences, Comparison, Determiners.		
Module:3	Interview and Resume skills	5 hours
Types of interview Structured and unstructured interview orientation, Closed questions and hypothetical questions, Interviewers' perspective, Questions to ask/not ask during an interview Techniques to face remote interviews Video interview, Recorded feedback, Phone interview preparation Mock Interview Tips to customize preparation for personal interview, Practice rounds Resume Template Structure of a standard resume, Content, color, font Use of power verbs Introduction to Power verbs and Write up Types of resume Quiz on types of resume Customizing resume Frequent mistakes in customizing resume, Layout - Understanding different company's requirement, Digitizing career portfolio		
Module: 4	PEST Analysis & Lean Concepts	3 hours
SLEPT, STEEPLE, 360 Feedback, Product life cycle, Waste reduction, Technology change, Product support		
Module:5	Decision making & Problem-solving skills	9 hours
Decision Making: Why is Decision making important?, Types of decision making and the process of decision making, The systematic approach to decision making using decision making matrix, The process and application of Decision tree analysis, The process and application of Pareto Analysis, The process of brainstorming. Problem Solving: Different between problem and symptom, Steps in problem solving, 5 Whys Analysis – technique and application, Cause and effect analysis- Fish bone diagram and its application, Understanding various significant factors of problem solving, mind mapping process and application, critical thinking and problem solving.		
	Total Lecture hours:	45 hours
Text Book(s):

Course code		L	T	P	J	C
MMA1001	MULTIMEDIA SYSTEMS	3	0	0	0	3
Pre-requisite	NIL	Syllabus version				
Course Objectives:						
This course is aimed at:						
<ol style="list-style-type: none"> 1. To learn the basics and Fundamentals of Multimedia. 2. To introduce Multimedia components and Tools. 3. To understand how Multimedia can be incorporated 						
Expected Course Outcome:						
At the end of this course, the students will be able to,						
<ol style="list-style-type: none"> 1. Define what Multimedia is and how that works. 2. Understand multimedia components using various tools and techniques. 3. Analyze and interpret Multimedia data. 4. Discuss about different types of media format and their properties. 5. Justify the right way of manipulating multimedia systems. 						
Module:1	MULTIMEDIA FUNDAMENTALS:	4 hours				
Multimedia, Multimedia Objects, Multimedia in business and work, Multimedia hardware, Memory & Storage devices, Communication devices.						
Module:2	MULTIMEDIA TOOLS	5 hours				
Presentation tools, object generation which includes video sound; image capturing, Authoring tools, card and page based authoring tools.						
Module:3	SOUND/AUDIO:	7 hours				
Perception of sound, hearing sensitivity, frequency range, sound- wave length, the speed of sound. measuring the sound, musical sounds, noise signal, dynamic range, pitch, harmonics-equalization-reverberation time, Sound isolation and room acoustics- treatments- studio layout –room dimensions. The Basic set-up of recording system; The production chain and responsibilities. Microphones types -phantom power, noise, choosing the right mike; Mixing console; Input devices; Output devices; Audio Publishing						
Module:4	GRAPHICS /IMAGE:	7 hours				
image file formats and how and where it is used, Principles of animation,2D and 3D animation, Morphing, Kinematics, tweening, Motion capture, character animation, modeling, special effects, and compositing, Video Conferencing, Web Streaming, Video Streaming, Internet Telephony - Virtual Reality - Artificial intelligence.						
Module:5	VIDEO:	6 hours				
different types of video camera including Handy Camera, Tape Formats, Analog Editing, Editing Equipment's and Consoles, Video Signal, Video Format, Video Lights - Types and Functions. Uses of Tripod- Types. Clapboard- Usage. Light meter. Other Useful Accessories.						

Module:6	MOTION PICTURE:	7 hours	
analogue and Digital camera, About lenses-viewing and monitoring - ENG-EFP - Types of Films - various storage media - Types of lights - video lights - cine lights – reflectors - Digital Video Camera- Types Format-Major Components, Operation and Functions? Aperture Shutter. Focusing Methods. Focal Length. Depth of Field			
Module:7	POST PRODUCTION:	7 hours	
post production setup like Architecture of a sound card, various video standards, capturing card - Media systems - Linear editing ,Nonlinear editing Video mixers and its functions, effects – plugins; Various display devices - personal, retail, corporate - LCD - Plasma - Media servers- Streaming - Graphic cards - video games - various mobile devices -narrow casting protocols - personal casting devices.			
Module:8	Contemporary issues:	2 hours	
Emerging Fields in Multimedia Technology –Industry Expert Talk			
		Total Lecture hours:	45 hours
Text Book(s)			
1.	Tay Vaughan, Multimedia: Making it Work (with CD), 9 th Edition, McGraw Hill Education		
Reference Books			
1.	Ranjan Parekh, Principles of Multimedia, 2 nd Edition, McGraw Hill Education, 2013.		
Mode of Evaluation: CAT/Assignment/Quiz/FAT			
Recommended by Board of Studies		12.6.2015	
Approved by Academic Council		No. 37	Date 16.6.2015

Course code		L	T	P	J	C
MMA1002	MEDIA ETHICS	2	0	0	0	2
Pre-requisite	NIL	Syllabus version				
Course Objectives:						
The course is aimed :						
<ol style="list-style-type: none"> 1. To provide a basic knowledge of the Indian constitution. 2. To focus on various laws related to media in India. 3. To educate the students on ethics to be possessed by media professionals. 						
Expected Course Outcome:						
At the end of the course the student should be able to						
<ol style="list-style-type: none"> 1. Understand the media laws of our Indian Constitution. 2. Discuss case studies on society, environment, culture, broadcasting and media. 3. Identify Copyright Acts pertaining to their productions 4. Examine and analyze ethical components of contemporary media 5. Analyze audience usage patterns of varied social media applications 						
Module:1	Media Ethics	5 hours				
Understanding Ethics – Difference between law and ethics – Ethical approaches, theories and professional morality – Ethical issues in mass media – Importance of media ethics to the society.						
Module:2	Media Regulations	5 hours				
Media role in information broadcasting – education – entertainment – commercial – religion & cultural integration – government & politics – health issues – economics – state security and reformation						
Module:3	Media & Society	3 hours				
Media industry - Social, Political and Cultural Influence - Information Society - Media Privatization - Media Audiences - Media and Social change						
Module:4	Media Reputation	3 hours				
Reputation and Dignity of persons – Defamation – Sedition – Privacy – Obscene, Indecent and harmful publications – plagiarism.						
Module:5	New Media and Agenda Setting	5 hours				
Intellectual and Institutional – copyright – new media – protection of news sources – contempt of court. Media uses and effects - individual characteristics - expectations - perceptions of media - uses and gratification theory. Agenda setting: media agenda, public opinion - media opinion – media gatekeepers - sources of media control.						
Module:6	Indian constitution	4 hours				
Freedom of media in India – Code of Ethics and guidelines for the media – Constitutional provisions for freedom of media in India – Reasonable restrictions as imposed by the constitution						

– major laws related to media in India			
Module:7 Media regulation			
			3 hours
The McBride commission – NANAP and NWICO – The Press Council Act and the Press Council of India – TRAI – Broadcasting bill and the BRAI – Indian Broadcasting Federation – Lokpal Bill and Lokayukta.			
Module:8 Guest Lecture			
			2 hours
Expert talk on the recent advancements of media, society and ethics.			
		Total Lecture hours:	30 hours
Text Book(s)			
1.	ParanjyGuhaThakurta, Dr.M.ManzoorAlam, R Mansukhani , R Mnaqlcolm, Mohd Z Haque “Media in our Globalizing World”, Genuine Publications and Media Pvt Ltd; First Edition edition, 2015.		
Reference Books			
1.	Jane Kirtley "Media Law Handbook", Bureau of International Information Programs United States Department of State, Published in 2010.		
	Authors, book title, year of publication, edition number, press, place		
Mode of evaluation: CAT/ASSIGNMENTS/ SEMINAR/QUIZ/ FAT			
Recommended by Board of Studies		05-10-2017	
Approved by Academic Council		No. 47	Date 05-10-2017

Course code		L	T	P	J	C
MMA 1003	DESIGN FUNDAMENTALS	0	0	6	0	3
Pre-requisite	NIL	Syllabus version				
Course Objectives:						
The course is aimed:						
<ol style="list-style-type: none"> 1. To provide a comprehensive knowledge about design theory, process, principles and elements 2. To understand basic terminology, progress, issues, and trend. 3. To study the various applications of design techniques. 						
Expected Course Outcome:						
At the end of the course the student should be able to:						
<ol style="list-style-type: none"> 1. Understand and apply principles of designs into given projects 2. Acquire and analyze different ideas about designs and its implementations 3. Possess good knowledge about industry standards of contemporary design and its implementations 4. Demonstrate progress in basic design shapes and color 5. Creative portfolio with industrial standards 						
Module:1	Creating different shapes on paper	10 hours				
<ol style="list-style-type: none"> 1. Drawing geometric shapes 2. Drawing organic shapes 3. Creating design patterns using both geometric and organic shapes 						
Module:2	Creating Color wheel: understanding the relationships between colors in design: Color Theory	10 hours				
<ol style="list-style-type: none"> 1. Creating 12 shades color wheel according to the color theory 2. Creating black and white color and tone shade card 3. Creating analogous and complementary color wheel 						
Module:3	Creating Value chart with poster color	10 hours				
<ol style="list-style-type: none"> 1. Creating the color value cart with 4 colors (red, blue, green, yellow) 2. Creating various designs with shape and color following the color theory and value chart 3. Creating Achromatic, monochromatic and polychromatic designs following the value chart and color theory 						
Module:4	Learning Typography	10 hours				
<ol style="list-style-type: none"> 1. Learning and drawing about different kinds of typography and their implementations 2. Writing different words in styles of typography reflecting the meaning of the words. 						

Module:5	Creating Logo Designs	10 hours
<ol style="list-style-type: none"> 1. Drawing logo designs of different genres of industries(educational, commercial, entertaining, government etc) 2. Creating different kinds of logos with shapes(geometric and organic shapes) 3. Creating different kinds of logos with colors(following color theory) 4. Creating different kinds of logos using shapes, colors and typography. 		
Module:6	Creating Design Layouts	10 hours
<ol style="list-style-type: none"> 1. Creating design sheets (A4 size) using shapes, colors, typography and images as posters 2. Creating design sheets with only shapes and colors 3. Creating design sheets with typefaces(eg: wordcloud) 4. Creating design sheets with images(hand drawn or printed images(collages) 		
Module:7	Understanding Graphic images	10 hours
<ol style="list-style-type: none"> 1. Design and create layouts with images (clipart, drawing, photograph etc) 2. Design and create layouts for film posters with graphic images (eg minimal posters) 3. Creating layout for banners and hoardings with measurement of images and typography 		
Module:8	Understanding Brochure: Creating brochures	10 hours
<ol style="list-style-type: none"> 1. Designing brochure in simple folds process and basic layout 2. Designing colored and texted brochure in different folds 3. Designing achromatic, monochromatic and polychromatic brochures 		
Module:9	Understanding book cover design: creating book covers	5 hours
<ol style="list-style-type: none"> 1. Designing the draft and sketches of book cover of different genres 2. Designing book cover in proper measurements with color and text. 3. Designing achromatic, monochromatic and polychromatic book covers 		
Module:10	Creating Design Portfolio	5 hours
<ol style="list-style-type: none"> 1. Finalizing and checking all the designs and drafts 2. Creating the portfolio and designing each page of the portfolio to make it more attractive and effective 		

	Total laboratory hours:		90 hours	
Text Book(s)				
1.	Rose Gonnella, Christopher Navetta, Max Friedman, Design Fundamentals: Notes on Visual Elements and Principles of Composition, 2015, 2 nd edition, Peachpit Press			
2.	David A. Lauer, Stephen Pentak, Design Basics, 2012, Eighth edition, Wadsworth Cengage Learning.			
Reference Books				
1.	Tina Sutton And Bride M. Whelan, The Complete Color Harmony, 2014, 2 nd Edition Impact Publication.			
2.	Timothy Samara, Making And Breaking The Grid,2015, 2 nd Publication, Rockport Publication.

Approved by Academic Council		No. 47	Date	05-10-2017

Course code		L	T	P	J	C
MMA 1004	FUNDAMENTALS OF ART	0	0	8	0	4
Pre-requisite	NIL	Syllabus version				
Course Objectives:						
The course is aimed:						
<ol style="list-style-type: none"> 1. To provide a comprehensive introduction to fundamentals of art 2. To understand the basic techniques about figure drawing, cartooning, composition of a scene or background and designs. 3. To learn the nuances in creating organic drawings. 						
Expected Course Outcome:						
At the end of the course the student should be able to:						
<ol style="list-style-type: none"> 1. Understand and apply techniques about drawing and sketching 2. Acquire knowledge about the basics forms of arts required for animation courses 3. Design and draw simple drawings in pencil and color about a given subject or concept 4. Demonstrate progress in human figure, cartoon character with movements 5. Create character development portfolio with industrial standards 						
Module:1	Study of light and shade, outline drawing of still life objects	12 hours				
<ol style="list-style-type: none"> 1. Study of light and shade in pencil of still life object 2. Drawing still life objects in outline by pen and pencil 3. Study of still life objects in pen and ink to trace the light and shade 						
Module:2	Developing the 3D character by different types of sketching	8 hours				
<ol style="list-style-type: none"> 1. Drawing any object in 3d style of drawing by following the light and shade 2. Drawing any object in 3d style of drawing by following the geometric planes. 						
Module:3	Perspective drawings	12 hours				
<ol style="list-style-type: none"> 1. Learning one point perspective 2. Learning two point perspective 3. Learning three point perspective 						
Module:4	Outdoor studies in perspective	12 hours				
<ol style="list-style-type: none"> 1. Drawing outdoor scenes showing one point perspective 2. Drawing outdoor scenes showing two point perspective 3. Drawing outdoor scenes showing three point perspective 						
Module:5	Indoor/ architectural studies in perspective	12 hours				
<ol style="list-style-type: none"> 1. Drawing indoor/architectural scenes showing one point perspective 2. Drawing indoor/architectural scenes showing two point perspective 3. Drawing indoor/architectural scenes showing three point perspective 						

3. Drawing a complete scene as a background for an animation/film scene/graphic novel etc. having different perspective views and light and shade		
Module:6	Creating compositional scene	12 hours
<ol style="list-style-type: none"> 1. Understanding a scene for a background of animation/film/graphic novel etc and preparing a sketch according to a conception 2. Drawing in details different objects and attributes of the scene in pencil and with light and shade 3. Creating a panorama view of a composition in details with perspectives and proper light and shade 		
Module:7	Human proportion	20 hours
<ol style="list-style-type: none"> 1. Drawing the male figure with proper proportion 2. Drawing the female figure with proper proportion 3. Drawing the male face with proper proportion 4. Drawing the female face with proper proportion 5. Drawing the hands and legs with proper proportion 		
Module:8	Drawing human figure with clothes and folds	8 hours
<ol style="list-style-type: none"> 1. Drawing male figure with clothes understanding the folds in basic postures 2. Drawing female figure with clothes understanding the folds in basic postures 		
Module:9	Drawing the human figure in basic movements: understanding the stick figure	12 hours
<ol style="list-style-type: none"> 1. Drawing the human figure as stick figure in different postures and gestures 2. Tracing the movement of the stick figure from sports and fashion magazine postures 3. Drawing the stick figure tracing the movements from life study in outdoor. 		
Module:10	Drawing animal figures with proper proportions and movements	8 hours
<ol style="list-style-type: none"> 1. Drawing simple animal figures (dogs, cat, horse, elephants etc) in proper proportion 		
Module:11	Development of a cartoon character	4 hours
<ol style="list-style-type: none"> 1. Study of different types of cartoon character 2. Creating cartoon character in reference to existing cartoon character and changing them to create characters of own's idea. 3. Creating a group of character for a given story or sequence 4. Creating a group of character for a given story or sequence 		
Total laboratory hours		120 hours

MMA1005	PROGRAMMING FUNDAMENTALS	3	0	2	0	4
Pre-requisite	NIL	Syllabus version				
Course Objectives:						
The course is aimed :						
<ol style="list-style-type: none"> 1. To enable students to understand fundamentals of programming language. 2. To gain knowledge in designing multimedia elements using code. 3. To enable students to develop game programs using Graphics. 						
Expected Course Outcome:						
At the end of the course the student should be able to :						
<ol style="list-style-type: none"> 1. Discuss the ways to represent different types of data, visually. 2. Justify suitable methods to process information according to variable types. 3. Develop programs for real time application using basics of programming language. 4. Design various multimedia elements using code. 5. Create simple game programs using C/ C++ programming language. 						
Module:1	Introduction to C:	6 hours				
Primitive Data types-Variables Constants,-Expressions, Basic Input/ Output operations (scanf(), printf()), Operators (arithmetic, relational, logical, bitwise and assignment operators).						
Module:2	Control Statements:	6 hours				
Decision making and Branching (if else, conditional, switch case), Looping (while(), do...while(), for loop, break and continue)						
Module:3	Arrays and String Handling:	6 hours				
Arrays (single and multi-dimension), character array, strings and standard library (strlen(), strcpy(), strcat() etc.)						
Module:4	Functions	6 hours				
Functions: Prototype – declaration - arguments (formal and actual), pass by value, pass by reference – return types						
Module:5	Function Types:	6 hours				
Types of functions; difference between built-in and user-defined functions; Template Functions- Recursive functions						
Module:6	Classes:	6 hours				
Data Abstraction –Encapsulation -Classes – objects – constructor – destructor – types of inheritance – Single – hierarchical– multiple – multi level – hybrid, dynamic memory allocation – new, delete operators.						
Module:7	Application of C++ programming in UI	7 hours				
GUI design – Menu creation – evolution of programming for game development						

Module:8	Guest Lecture	2 hours	
Expert talk on Application of C++ programming in Gaming.			
		Total Lecture hours:	45 hours
Text Book(s)			
1.	Byron Gottfried and Jitender Chhabra, "C Programming with C (Schaum's Outlines Series)", Fifth Edition, McGraw Hill Education, 2015.

MMA1006	GRAPHIC DESIGN TECHNIQUES	0	0	8	4	5
Pre-requisite	NIL	Syllabus version				
Course Objectives:						
The course is aimed to:						
<ol style="list-style-type: none"> 1. Acquire the competency in technical skills applicable to graphic design. 2. Understand the ability to use design thinking strategies in an iterative design process. 3. Enrich the skill level of graphic design through the topics 						
Expected Course Outcome:						
At the end of the course the student should be able to:						
<ol style="list-style-type: none"> 1. Seek design principles, design process, theory, history and contemporary design practice. 2. Gain proficiency in identified technical skills, understand the process of creating, analyzing, and evaluating graphic design solutions. 3. Justify the choice of appropriate tools according to the type of digital art work 4. Visualize and demonstrate an idea and express it through visual design 5. Demonstrate the knowledge of design & colors and apply them effectively to various assignments. 						
Module:1	Logo Design	10 hours				
<ul style="list-style-type: none"> • Creating a paper work of different logos on the genre. • Tracing the layout of the approved designs in digital format. • Applying suitable color for the digital designs. • Designing approved different logos on the genre. 						
Module:2	Visiting Cards	10 hours				
<ul style="list-style-type: none"> • Creating a paper work of different Visiting cards on the genre. • Tracing and designing the approved layout of designs in digital format. 						
Module:3	Brochures (A4 Size, A4 2 Fold, A4 3 Fold)	10 hours				
<ul style="list-style-type: none"> • Creating a paper work of brochures on the genre. • Tracing the layout of the approved designs in digital format. • Applying suitable color for the digital designs. • Designing approved brochures of varied sizes. 						
Module:4	Print Advertisement - Black & White, Color	10 hours				
<ul style="list-style-type: none"> • Creating a paper work of advertisement flyers on the genre. • Tracing the layout designs in digital format and applying suitable colors. 						

<ul style="list-style-type: none"> • Creating a paper work of poster advertisement on the genre. • Tracing the layout designs in digital format and applying suitable colors 			
Module:5	Letter Head		10 hours
<ul style="list-style-type: none"> • Creating paper work of letter head designs. • Tracing the layout designs in digital format, designing and applying suitable colors. 			
Module:6	Package Design		10 hours
<ul style="list-style-type: none"> • Creating a paper work of package designs on the genre. • Tracing the layout of the approved designs in digital format. • Designing approved package designs with suitable colors and text. 			
Module:7	Matte Painting		10 hours
<ul style="list-style-type: none"> • Create a different scenic view of a green pasture or a haunted village. • Designing approved scenic view in digital format using the designing software. 			
Module:8	Montage		10 hours
<ul style="list-style-type: none"> • Create different montages on the topic Indian culture or eradication of poverty in the world. • Compiling the approved pictures or materials using the designing software. 			
Module:9	Black & White to Color		10 hours
<ul style="list-style-type: none"> • Converting a black & white picture into colored using the image editing software. 			
Module:10	Newsletter		10 hours
<ul style="list-style-type: none"> • Creating a paper work of newsletter on the genre. • Tracing and designing the approved layout of designs in digital format. 			
Module:11	Webpage Design		10 hours
<ul style="list-style-type: none"> • Creating a paper work of webpage designs on the genre. • Designing the layout of the approved designs in digital format. 			
Module:12	Color Correction		10 hours
<ul style="list-style-type: none"> • Creating a paper work of art designs on the genre. • Applying different colors to them by using suitable color modes. 			
	Total Laboratory hours:	120 hours

MMA2001	ART FOR ANIMATION	0	0	6	4	4
Pre-requisite	MMA1004	Syllabus version				
Course Objectives:						
The course is aimed:						
<ol style="list-style-type: none"> 1. To provide a comprehensive introduction to different techniques related to art for animation 2. To understand basic terminology, progress, issues, and trends. 3. To study the various application of art in creating animation projects. 						
Expected Course Outcome:						
At the end of the course the student should be able to:						
<ol style="list-style-type: none"> 1. Understand and apply various techniques of drawing for animation. 2. Analyze a given story or scenario and draw necessary artworks related to it. 3. Process knowledge about art in animation field. 4. Understand and create the different human figure usage for animation poses. 5. Design and finalize animation ready art-work. 						
Module:1	Developing Human Figure	9 hours				
<ol style="list-style-type: none"> 1. Drawing male figure in geometric blocks 2. Drawing female figure in geometric blocks 3. Drawing different gestures and postures of male and female figures in geometric blocks taking reference from wooden model 4. Drawing life sketches of male and female figure in geometric blocks to understand the movements and 3d character 						
Module:2	Developing human figure with detail body muscle	9 hours				
<ol style="list-style-type: none"> 1. Drawing male figure with body muscles 2. Drawing female figure with body muscles 3. Drawing different gestures and postures of male and female figures with body muscles. 						
Module:3	Portrait study	9 hours				
<ol style="list-style-type: none"> 1. Detail portrait study of male face 2. Detail portrait study of female face 						
Module:4	Character design	9 hours				
<ol style="list-style-type: none"> 1. Drawing of a character according to a concept 2. Drawing the detail of the character with cloths and props according to a concept 3. Drawing the four angle views of a character with proper details according to a concept 4. Drawing different gestures and postures of a character with proper details according to a concept 						
Module:5	Completing character designs for a given concept story	9 hours				
<ol style="list-style-type: none"> 1. Drawing characters for a given concept story 						

	2. Drawing the characters with props and dresses according to the story requirement 3. Drawing the characters in complete turnarounds	
Module:6	Background for the story	9 hours
	1. Developing the background, shot sequences for a concept story applying perspective views and foreshortening 2. Drawing the background in pencil sketch 3. Drawing the background in color details	
Module:7	Prop design	9 hours
	1. Drawing different kinds of props from real life 2. Developing different kinds of props according to a concept 3. Drawing different kinds of props with implementation and relevance to a character and story	
Module:8	Complete setup drawing	9 hours
	1. Drawing the background and shot sequence for a given concept with details of characters and props 2. Developing five major scenes with all details of characters and props in pencil 3. Developing five major scenes with all details of characters and props in color	
Module:9	Storyboard drawing	9 hours
	1. Drawing simple storyboard according to a given storyline 2. Drawing simple storyboard according to an original story by the student	
Module:10	Design a comic book/graphic novel	9 hours
	1. Drawing the draft of a comic book or graphic novel 2. Drawing the details of the character and props for the graphic novel/comic book 3. Drawing the final book with details per block in black and white or in color	
	Total Laboratory hours:	90 hours
Text Book(s)		
1.	Don Bluth, "Art Of Animation Drawing", First Edition, DH Press,2014

Approved by Academic Council		No.37	Date 16-06-2015

Course code		L	T	P	J	C
MMA2002	INTERACTIVE ANIMATION TECHNIQUES	0	0	8	4	5
Pre-requisite	MMA1004	Syllabus version				
Course Objectives:						
The course is aimed at:						
<ol style="list-style-type: none"> 1. Developing the basic skills necessary for the student to produce digital character based animation, titles for film and video. 2. Learning and experiencing the arts of storytelling, animation and cinematography while making 2D animation movies, motion graphics, and GIF stickers. 3. Understanding principles that translate sequential images into action to make animation believable 						
Expected Course Outcome:						
By the end of the course, student should be able to:						
<ol style="list-style-type: none"> 1. Define and apply design principles and theories to animation production. 2. Identify the 12 principles of animation and apply them. 3. Assess, criticize the current animation trends in relation to the past trends. 4. Demonstrate progress in basic drawing and animation skills 5. Create traditional and computer generated 2D animation based on current industry trends and practices 						
Module:1	Introduction to animation	08 hours				
<ul style="list-style-type: none"> • History of animation: Types of animation: case study • Understanding and learning the Principles of animation through the view of different animation films: case study 						
Module:2	Flip Book	08 hours				
<ul style="list-style-type: none"> • Drawing simple flip book with minimum 30 pages • Drawing a detail flip book with minimum 30 pages following the principles of animation 						
Module:3	2D Software Interface	08 hours				
<ul style="list-style-type: none"> • Understanding the 2d software interface • Drawing tools, pen tools and other necessary tools to create any drawing in the frames. 						
Module:4	Frame by frame animation	08 hours				
<ul style="list-style-type: none"> • Creating frame by frame animation for a short animation(maximum 10 sec with simple drawing. • Creating simple frame by frame animation for a short animation(maximum 20 sec with color drawings and background. 						
Module:5	Tween	16 hours				
<ul style="list-style-type: none"> • Creating simple animation with shape, classic & motion tweening. • Creating simple animation with shape and classic tween together. 						

Module:6	Ball animation	16hours
<ul style="list-style-type: none"> • Drawing the ball with gradient color . • Creating key frames for the animation sequence • Creating stretch and squash for the ball animation • Creating timing and motion for the ball animation • Giving tween to the sequence of ball animation • Creating the shadow layer for the ball animation 		
Module:7	Character drawing and creating symbols	12 hours
<ul style="list-style-type: none"> • Drawing simple character with pen tool or shape tool • Preparing the character for animation: dividing each body parts into symbol • Creating symbols, types of symbols 		
Module:8	Human walk cycle	08 hours
<ul style="list-style-type: none"> • Drawing the cycle sheet for a human walk cycle. • Creating the key frames for the walk cycle. • Giving the tween to the figure with normal walk cycle. • Creating four different types of walk cycle (jump, run, tip toe, crawl). 		
Module:9	Animal walk cycle	16 hours
<ul style="list-style-type: none"> • Drawing cycle sheet for an animal walk cycle • Drawing an animal and dividing the body parts into symbols • Creating the key frames for the walk cycle • Creating four different types of walk cycle (jump, run, tip toe, crawl) 		
Module:10	Lip Synchronization	8 hours
<ul style="list-style-type: none"> • Knowing the alphabets and its movements • Creating the mouth shapes for each letters and movements of the lips. • Creating expression and emotion in character. • Synchronizing character mouth shape according to the dialogue. 		
Module:11	Creating a short animation film	12 hours
<ul style="list-style-type: none"> • Drawing the detail storyboard for the animation film • Drawing the background in layers and symbols • Creating the characters in turn around • Creating the props • Creating the scenes with tween and animation • Completing the whole animation film with background music and dialogues 		
Total Laboratory hours:		120 hours
Text Book(s)

MMA2003	WEB DESIGN TECHNIQUES	0	0	6	4	4
Pre-requisite	MMA1003	Syllabus version				
Course Objectives:						
The course is aimed to,						
<ol style="list-style-type: none"> 1. Highlight the theories and principles underlying website design 2. Understand the concept of design and implementation of HTML CSS to design a particular design of their creativity. 3. Understand the principles of creating an effective webpage, including an in-depth consideration of information architecture. 						
Expected Course Outcome:						
At the end of the course the student should be able to,						
<ol style="list-style-type: none"> 1. Understand the latest trends used in web designing. 2. Demonstrate the knowledge and ability to apply the design principles, techniques and technologies to the development of creative websites. 3. Understand how to plan and conduct user research related to web-usability 4. Implement techniques of information design to interactive media projects. 5. Develop multi-tier fully functional commercial websites. 						
Module:1	Structure & Lists	10 hours				
<ol style="list-style-type: none"> 1. Creating a structure of the web page layout. 2. Creating basic wireframe layout using Adobe Photoshop. 3. Creating lists using basic HTML coding. 						
Module:2	Tables & Forms	10 hours				
<ol style="list-style-type: none"> 1. Creating web layouts using tables method in Adobe Dreamweaver. 2. Creating forms using Dreamweaver. 						
Module:3	Cascading Style Sheet	10 hours				
<ol style="list-style-type: none"> 1. Working on the basics of Cascading Style Sheet. 2. Creating a basic layout using CSS styling. 3. Creating basic links for buttons using HTML coding. 						
Module:4	Static Commercial	10 hours				
<ol style="list-style-type: none"> 1. Creating rough paper work layout of a commercial static webpage for the genre. 2. Creating different sitemap layout of a commercial static webpage for the genre. 3. Creating banner advertisements related to commercial products for the static web-pages. 4. Designing approved commercial static responsive web-pages using HTML CSS . 						
Module:5	Static Non - Commercial	10 hours				
<ol style="list-style-type: none"> 1. Creating rough paper work layout of a non-commercial static webpage for the genre. 2. Create different sitemap layout of a non-commercial static webpage for the genre. 						

3. Creating banner ads and pop up advertisements related to non-commercial products for the static web-pages.		
4. Designing approved non-commercial static web-pages using HTML CSS.		
Module:6	Dynamic Commercial	10 hours
1. Create a rough paper work layout of a commercial dynamic webpage for the genre.		
2. Create rough paper work layout of a non-commercial dynamic webpage for the genre.		
3. Create different sitemap layout of a commercial dynamic webpage for the genre.		
4. Creating banner ads and pop-up ads related to genre for the dynamic web-pages.		
5. Adding up banner ads and pop-up ads in dynamic webpage designs.		
Module:7	Dynamic Non - Commercial	10 hours
1. Create different sitemap layout of a non-commercial dynamic webpage for the genre.		
2. Designing approved commercial dynamic responsive web-pages using HTML CSS		
3. Creating banner ads and pop-up ads related to non-commercial products for the dynamic web-pages.		
4. Designing approved non-commercial dynamic web-pages using HTML CSS.		
Module:8	Online Portfolio	10 hours
1. Creating blueprints for a creative portfolio.		
2. Creating flowchart for a creative portfolio.		
3. Creating sitemaps for a creative portfolio.		
4. Designing approved designs using software's Flash and Photoshop.		
Module:9	Static Responsive	10 hours
1. Creating blueprints, flowchart, sitemap for a creative responsive static page.		
2. Designing approved designs using software's Flash and Dreamweaver.		
Total Laboratory hours:		90 hours

Approved by Academic Council	No. 47	Date	5.10.2017

Course code		L	T	P	J	C
MMA2004	BASIC PHOTOGRAPHY	0	0	8	4	5
Pre-requisite	MMA1004	Syllabus version				
Course Objectives:						
The Course is aimed :						
<ol style="list-style-type: none"> 1. To understand the functional working of a still camera 2. To understand the Art of Composition, Framing and Lighting. 3. To create mood with lights and how to capture various emotions through camera. 						
Expected Course Outcome:						
At the end of the course the student should be able to						
<ol style="list-style-type: none"> 1. Operate a Digital SLR Camera, Flash Lights and its related accessories. 2. Analyse and infer various conditions and environments for a photo-shoot and capture it. 3. Plan the requirements and complete a successful Product or a Model Shoot. 4. Visualize concepts and shoot photos based on a theme or a one-liner. 5. Appraise photographs based on Composition, Lighting, Subject and Mood. 						
Module:1	Basics of Camera	15 Hours				
How to handle Camera properly and take a shot Setting Aperture, Shutter Speed and ISO for different Shots White Balance and Shooting Modes in D-SLR Camera						
Module:2	Flash & Lights	15 Hours				
How to use 3 Point Lighting using Cool Lights Flash settings and Operations Use of Reflector, Cutter and Diffuser Handling Use of Light Meter						
Module:3	Outdoor (Landscape & People)	15 Hours				
Outdoor – Landscape Photo-shoot of Outdoor (Landscape)around the VIT Campus. Color correction to the taken photos according to his creativity.						
Outdoor – People Photo-shoot of Outdoor (People)around the VIT Campus. Color correction to the taken photos according to his creativity.						
Module:4	Outdoor (Birds & Animals	15 Hours				
Outdoor – Birds/Animals Photo-shoot of Outdoor (Birds/Animals) around the VIT Campus Color correction to the taken photos according to his creativity.						
Module:5	Outdoor – Monuments	15 Hours				
Outdoor – Monuments Photo-shoot of Outdoor (monuments).						

Color correction to the taken photos according to his creativity			
Module:6	Photo Language And Portrait	15 Hours	
Photo Language And Portrait: Photo-shoot of photo language concept and portrait photography around the VIT campus. Color correction to the taken photos according to his creativity.			
Module:7	Freezing Moment and Panorama Special	15 Hours	
Freezing Moment and Panorama Special Photo-shoot of freezing moment and panorama. Student will take pictures of their own using panorama concepts round the VIT campus. Color correction to the taken photos according to his creativity.			
Module:8	Special Effects & Indoor Photography	15 Hours	
Special Effects & Indoor Photography Product photography Macro photography Event photography Night photography Festival photography			
		Total Laboratory Hours:	120 Hours
Text Book(s)			
1.	Kathy Burns-Millyard," Digital Photography Basics: A Beginner's Guide to Getting Great Digital Photos", 2014, second edition, published by electronic perceptions.

MMA2005	LIGHTING & RENDERING	0	0	6	4	4
Pre-requisite	MMA1004	Syllabus version				
Course Objectives:						
This course is aimed:						
<ol style="list-style-type: none"> 1. To create photorealistic still imagery. 2. To possess virtual lighting technologies and the tools necessary to create photorealistic imagery. 3. To understand the nuances of rendering pipeline and basic compositing. 						
Expected Course Outcome:						
By the end of this course, the students will be,						
<ol style="list-style-type: none"> 1. Aware of the physical and virtual technology of lighting. 2. Sensitive to the interaction of light on 3D surfaces. 3. Creative in adjusting the renderer settings. 4. Capable to justify the optimal render settings for different types of 3D lit projects. 5. Able to tweak the material shaders in achieving desired output. 						
Module:1	Lighting the 3D model using Basic lighting	15 hours				
<ul style="list-style-type: none"> ● Module content Preview Lights and to choose its Colors ● Point light and its properties ● Direction light and its properties ● Spot light, penumbra angle, Barn doors and its settings ● Area light and its implementation in real-time environment. 						
Module:2	Various Lighting Techniques	10 hours				
<ul style="list-style-type: none"> ● Software Lighting Techniques ● Light Intensity and Digital Colors ● Light Linking & Object Linking 						
Module:3	Rendering	10 hours				
<ul style="list-style-type: none"> ● Introduction about Renderer Nodes ● Interior scene lighting using GI renderer - Criteria 1 ● Interior scene lighting using GI renderer - Criteria 2 						
Module:4	Product Lighting & Environment Lighting	15 hours				
<ul style="list-style-type: none"> ● Three Point Lighting Technique ● Lighting a product using three-point lighting techniques ● Photons and Caustics Lighting Methods ● Global Illumination and Final Gathering ● Photons and Caustics Lighting Methods 						
Module:5	Advanced Rendering materials	10 hours				
<ul style="list-style-type: none"> ● Advanced Materials for GI rendering ● Light Baking for Games 						

<ul style="list-style-type: none"> • Exploring Paint Effects features • Layer Based Rendering and its Memberships 			
Module:6	Exterior and IBL Rendering	10 hours	
<ul style="list-style-type: none"> • Image Based Lighting for a 3D Object • Rendering an Exterior using Image based Lighting • Optimization techniques for lighting the scene. 			
Module:7	Intro to Multi-pass rendering	10 hours	
<ul style="list-style-type: none"> • Creating multiple pass rendering for 3D objects • Customizing lights, Import and export settings. • Materials and lighting techniques used for 3D tracking. 			
Module:8	Multi-pass Composition	10 hours	
<ul style="list-style-type: none"> • Compositing Multiple pass rendering in to a single image/Video in image editing tool • Compositing Multiple pass rendering in to a single image/Video in compositing tool • Lighting a Photo-realistic scene based on a live Reference-Portfolio creation-1 • Lighting a Photo-realistic scene based on a live reference-Portfolio creation-2 			
		Total Laboratory hours:	90 hours

MMA3001	MODELING AND TEXTURING	0	0	8	4	5
Pre-requisite	MMA1004	Syllabus version				
Course Objectives:						
The course is aimed:						
<ol style="list-style-type: none"> 1. To explore the principles of 3D design. 2. To gain knowledge in creating 3D assets and product development. 3. To create and texture a simple 3D Model. 						
Expected Course Outcome:						
At the end of the course the student should be able to						
<ol style="list-style-type: none"> 1. Create various 3D models according to the topology. 2. Texture the 3D models by using UV unwrapping and shading techniques. 3. Create realistic and semi realistic models with appropriate details in both mesh and texture level. 4. Construct effective modeling & texturing pipeline. 5. Justify the right modeling techniques while creating 3D assets. 						
Module:1 Creating a 3D Scene from Primitives						
						10 hours
<ol style="list-style-type: none"> 1. Preview Lights and to choose its Colors 2. Point light and its properties 3. Direction light and its properties 4. Spot light, penumbra angle, Barn doors and its settings 5. Area light and its implementation in real-time environment. 						
Module:2 Understanding the NURBS Primitives						
						10 hours
<ol style="list-style-type: none"> 1. Further introduction to the Maya GUI. 2. Polygon components (vertices, edges, faces). 3. Creating and editing geometry from primitives. 4. Groups and Hierarchies. 5. Duplication vs. Instancing. 						
Module:3 Polygon mesh editing tools						
						15 hours
<ol style="list-style-type: none"> 1. Additive vs. subtractive Modeling. 2. Manually manipulating component. 3. Splitting polygons vs. deleting edges. 4. Polygon extrusion. 						
Module:4 Working with Polygon Primitives						
						15 hours
<ol style="list-style-type: none"> 1. Creating basic block of interior house. 2. Adding detail into interior house. 3. Modeling various types of props for interior. 4. Creating model of exterior building. 						

5. Modeling various types of props for exterior.		
6. Creating a 3D model of Urban.		
Module:5	Materials and Texturing	15 hours
1. Understanding UV texture space.		
2. Simple UV projection.		
3. Introduction to materials and textures.		
4. Basic lighting.		
Module:6	Deformers	10 hours
1. Non-linear deformers.		
2. Deformation order.		
3. Hierarchies for animation		
Module:7	NURBS and spline-based Modeling	15 hours
1. Basic NURBS spline-based Modeling concepts.		
2. NURBS to polygon conversion.		
3. Boolean Modeling techniques.		
4. Construction history.		
5. Essential steps to prepare a character model for animation.		
Module:8	Modeling with Deformers	15 hours
1. Using Lattice.		
2. Soft modification tool.		
3. Combining meshes.		
4. Using bevel plus and bevel edges.		
5. Create an extrusion curve.		
6. Extrude along a curve.		
Module:9	Creating a mechanical object	15 hours
1. Creating a basic exterior of modern car.		
2. Adding detail to exterior of modern car.		
3. Modeling a basic interior of modern car.		
4. Adding detail to interior of modern car.		
5. Unwrapping UV of exterior car using UV Texture editor.		
6. Unwrapping UV of interior car using UV Texture editor.		
7. Creating textures using image-editing software.		
8. Assigning materials to the car mesh.		
9. Optimizing 3d car model.		
Total Laboratory hours:		120 hours

MMA3002	3D Animation	0	0	8	0	4
Pre-requisite	MMA2001	Syllabus version				
Course Objectives:						
The course is aimed at:						
<ol style="list-style-type: none"> 1. Creating solid base in animation fundamentals. 2. Understanding different animation styles and techniques, and how to apply. 3. Enriching the student skill set to meet professional expectations necessary for a career in the expanding industry of entertainment. 						
Expected Course Outcome:						
By the end of the course, student should be able to:						
<ol style="list-style-type: none"> 1. Apply principles to create realistic and cartoony animation. 2. Create believable body mechanics animation. 3. Explore the foundations of physics, weight and movement, and timing. 4. Integrate convincing body mechanics with action effectively. 5. Use high-quality references and artistic studies to create production quality work. 						
Module:1	Evaluation of Animation and its types.	15 hours				
<ul style="list-style-type: none"> ● Understanding different styles of animation. ● Applying principles in inorganic animation 						
Module:2	Understanding and Creating different rough walk cycle on paper using ball and leg character normal walk.	15 hours				
<ul style="list-style-type: none"> ● Understanding the walk cycle techniques ● Drawing the basic walk cycle exercises on various style action basics ● Drawing the finalized walk cycle concept. 						
Module:3	Understanding and Creating different rough walk cycle on paper using ball and leg character stylized walk.	10 hours				
<ul style="list-style-type: none"> ● Understanding the walk cycle techniques and drawing the smart scribbles for sketch segmentation thumbnails of the walk cycle ● Drawing the basic walk cycle exercises on various style action basics ● Drawing the finalized walk cycle concept. ● Drawing the finalized concept 						
Module:4	Key frame, Mixing up the finalized walk cycle concept and Applying with the basic 12 principles.	13 hours				
<ul style="list-style-type: none"> ● Implementing the finalized concept with principles in software. 						

	<ul style="list-style-type: none"> ● Making blocking and finalize the blocking for approval. ● Creating the rough animation and in-betweens in blocking for approval. ● Adding additional smooth walk (secondary action) blocking for approval. ● Final rendered output of the walk cycle animation. 	
Module:5	Key frame, Creating animation using ball and tail character.	15 hours
	<ul style="list-style-type: none"> ● Creating the concept art for ball and tail character in paperwork using smart scribbles for sketch segmentation thumbnail. ● Making iteration on concept edge and finalization of the concept work in paper. ● Making blocking and finalize the blocking for approval. ● Creating the rough animation and in-betweens in blocking for approval. ● Adding additional smooth walk (secondary action) blocking 	
Module:6	Creating a story based concept involving the two characters ball, ball and tail animation for fast timing and acting sequence 1.	08 hours
	<ul style="list-style-type: none"> ● Creating the concept art of ball, ball and tail character in paperwork smart scribbles for sketch segmentation thumbnail. ● Making iteration on concept edge and finalization of the concept work in paper. ● Making blocking poses and finalizes the blocking for approval. ● Creating the rough animation (keying) and in-betweens in blocking for approval. ● Adding additional smooth walk (secondary action) blocking for approval. ● Final rendered output of the acting animation. 	
Module:7	Creating a story based concept involving the two characters' ball, ball and tail animation for slow timing and acting sequence 2.	05 hours
	<ul style="list-style-type: none"> ● Creating the concept art of ball, ball and tail character in paperwork smart scribbles for sketch segmentation thumbnail. ● Making iteration on concept edge and finalization of the concept work in paper. ● Making blocking poses and finalizes the blocking for approval. ● Creating the rough animation (keying) and in-betweens in blocking for approval. ● Adding additional smooth walk (secondary action) blocking for approval. ● Final rendered output of the acting animation. 	
Module:8	Creating references for animation in method acting.	08 hours
	<ul style="list-style-type: none"> ● Drawing the concept work on story and acting screen of the character like ball and tail, students will take the task of acting it out from their own story. ● Creating different kinds of acting and finalizing one of best. 	

<ul style="list-style-type: none"> ● Based the finalized act, student will proceed to 3d software animation, rough animation (keying) and in-betweens in blocking for approval. ● Adding additional smooth walk (secondary action) blocking for approval. ● Final output of the acting animation. 			
Module:9	Micro and Macro correction over finalized 3d animation for timing.	05 hours	
<ul style="list-style-type: none"> ● Applying principles according to the timing needs for giving more detail attraction over the character. ● Understanding and implementing the timing over character to show the mood. 			
Module:10	Creating facial expression on ball and tail character.	05 hours	
<ul style="list-style-type: none"> ● Shooting the facial action according to the own story, drawing the facial action execute as final facial expression. ● Implementing and transformation of action to 3d character ball and tail. ● Adding additional smooth pass (secondary action) for approval. ● Final rendered output of the acting animation. ● Introducing humanoid 3D Character for basic walk cycle. 			
Module:11	Understanding basic physical movement and its implementation drawing the smart scribbles for sketch segmentation thumbnail for the walk cycle.	21 hours	
<ul style="list-style-type: none"> ● Drawing the basic walk cycle exercises on various style action basics. ● Drawing the finalized walk cycle concept. ● Creating the rough animation (keying) and in-betweens in blocking for approval. ● Adding additional smooth walk (secondary action) blocking for approval. ● Final rendered output of the acting animation.

Course code		L	T	P	J	C
MMA3003	Visual Effects	0	0	8	4	5
Pre-requisite	MMA2004	Syllabus version				
Course Objectives:						
The course is aimed :						
<ol style="list-style-type: none"> 1. To learn the Basics of compositing using layer based compositing software. 2. To understand the tools and techniques of compositing. 3. To practice the categories in compositing process. 						
Expected Course Outcome:						
At the end of the course student should be able to :						
<ol style="list-style-type: none"> 1. Gain good understanding about compositing process. 2. Identify major applications of compositing techniques used in industry. 3. Develop a visual effects pipeline. 4. Demonstrate an in-depth knowledge of grading and VFX principles, practice and system capabilities. 5. Create customized tools through software or scripting to allow for more creative application of visual effects techniques. 						
Module:1	Animation and Titling	15 hours				
<ol style="list-style-type: none"> 1. To understand interface of the layer based software and the basic key framing. 2. Basic motion graphic elements 3. Animation (every student will create their own animation using transformation tools and apply key frames for 150 frames) 4. Title Animation (Student will create titling using given footage by faculty) 5. Titling (own titling just using texts) 						
Module:2	Color Correction, Color grading & Tint	15 hours				
<ol style="list-style-type: none"> 1. To understand color correction options and methods. 2. Color Correction (using given footage by faculty). 3. Night Conversion (using given footage by faculty). 4. Night Conversion (using given footage by faculty). 5. Night Conversion (student will shoot his/her own footage and use it for day to night conversion) 						
Module:3	Basic Compositing	15 hours				
<ol style="list-style-type: none"> 1. Compositing tools and properties. 2. Compositing (using given object by faculty) normal with animation. 3. Compositing (using given object by faculty) Green Screen. 4. Compositing (own footage) normal with animation. 5. Compositing (own footage) green screen. 						
Module:4	Rotoscopy	15 hours				
<ol style="list-style-type: none"> 1. Tools and techniques of doing a Rotoscopy. 2. Rotoscopy (using given footage by faculty) 						

3. Rotoscopy (using given footage by faculty)		
4. Doing rotoscopy in own footage 150 frames		
Module:5	Retouch /Paint	15 hours
1. To understand the paint tools		
2. Retouch (using given object by faculty)		
3. Wire removal (using given object by faculty)		
4. Doing retouch in own footage 150 frames.		
Module:6	Tracking	15 hours
1. To understand the tracking tools.		
2. Tracking (using given object by faculty)		
3. Match move (using given object by faculty)		
4. Stabilization and camera shake (using given object by faculty)		
5. Matchmove with own footage 250-300 frames		
Module:7	3D Compositing	10 hours
1. To understand 3d compositing techniques.		
2. Compositing (using given object by faculty) Green Screen.		
3. Compositing (using given object by faculty)		
4. Compositing (own footage) normal with animation		
5. Compositing (own footage) green screen.		
Module:8	Particle Effects	10 hours
1. To understand the Effects and particles		
2. Effects (using given object by faculty) normal with Animation		
3. Particle Compositing (using given object by faculty) Green Screen.		
4. Compositing (own footage) green screen using effects.		
Module:9	Show reel	10 hours
1. How to make show reels with break-downs.		
2. The student will create a mini show reel (3-4min including breakdowns) using the skills he learned in this subject.		
3. The Student will submit the final output in cd for screening.		
4. Experts will review each student output and lecture about advanced compositing		
Total laboratory hours:		120 hours

MMA1008	MULTIMEDIA DATABASES	2	0	0	0	2
Pre-requisite	NIL	Syllabus version				
Course Objectives:						
The Course is aimed at:						
<ol style="list-style-type: none"> 1. To understand fundamentals of database systems and multimedia DBMS 2. To introduce multimedia data management. 3. To inculcate different types of queries and indexing. 						
Expected Course Outcome:						
At the end of this course, the students will be able to,						
<ol style="list-style-type: none"> 1. Acquire knowledge of Image databases, Text/Document databases, Audio and Video databases 2. Discuss multimedia retrieval techniques. 3. Justify the right querying and indexing methodologies. 4. Create database retrieval methods with suitable language. 5. Choose the appropriate DB tool to deal with Audio and Video databases. 						
Module:1	DBMS Foundation:	5 hours				
Overview of Database Systems, Introduction to Database Design						
Module:2	Relational Model and SQL:	3 hours				
Relational Model, SQL: Queries, Constraints						
Module:3	Data Structure Essentials:	3 hours				
Multidimensional Data Structures k-d Trees, Point Quadtrees.						
Module:4	Multimedia Databases:	4 hours				
Design and Architecture of a Multimedia Database, Organizing Multimedia Data Based on The Principle of Uniformity, Media Abstractions						
Module:5	Querying and Indexing:	3 hours				
Query Languages for Retrieving Multimedia Data, Indexing SMDSS with Enhanced Inverted Indices.						
Module:6	Image Databases:	3 hours				
Raw Images, Compressed Image Representations, Similarity- Based Retrieval, Alternative Image DB Paradigms.						

Module:7	Text/Document Databases:	4 hours
Text/Document Databases Precision and Recall, Stop Lists, Word Stems, and Frequency Tables, Latent Semantic Indexing, TV-Trees, Other Retrieval Techniques		
Module:8	Video and Audio Databases:	3 hours
Video Databases Organizing Content of a Single Video, Querying Content of Video Libraries, video Standards Audio Databases A General Model of Audio Data.		
	Expert talks on recent trends in Multimedia Database Technology and Content based Multimedia Indexing	2 hours

Course Code		L	T	P	J	C
MMA2007	Game Development	0	0	8	4	5
Pre-requisite	MMA1005	Syllabus version				
Course Objectives:						
Course is aimed:						
<ol style="list-style-type: none"> 1. To Identify the fundamental concepts and key issues of the Game development discipline. 2. To gain knowledge to create game for various platforms. 3. To Articulate a clear and comprehensive game structure which is verified during game development. 						
Expected Course Outcome:						
At the end of course, students should be able to,						
<ol style="list-style-type: none"> 1. Differentiate the tools and techniques involved in creating 2D & 3D games. 2. Identify and apply suitable methods to create games for various platforms. 3. Design and conduct experiments to address problems germane to the discipline. 4. Ability to understand current and future trends in gaming industry. 5. Integrate 2D & 3D assets in to Game Engines to publish Games. 						
Module:1	Essential concepts of Scripting	12 Hours				
<ol style="list-style-type: none"> 1. Behaviors of game objects 2. Basic C# scripting 3. Introducing scripting in unity 						
Module:2	Building Block of Scripts	14 hours				
<ol style="list-style-type: none"> 1. Method instead of function 2. Introducing Classes 3. Passing values between the classes 4. Using objects and classes in game script 						
Module:3	Details of Variables	15 hours				
<ol style="list-style-type: none"> 1. Understanding component property in scripts 2. Displaying public variables in inspector panel 3. Multi-word variable names 4. Common – built – in variable types 5. Variable scopes 						
Module:4	Methods' Properties	15 hours				
<ol style="list-style-type: none"> 1. Using method in a script 2. Specifying methods parameters 3. Passing & Returning value from the method 4. Start () and Update () methods 						
Module:5	Decision making in games	18 hours				
<ol style="list-style-type: none"> 1. Condition testing using if statement 2. Usage of Foreach loop 3. Usage of while loop 						

<ol style="list-style-type: none"> 4. Storing game objects in array 5. Storing game objects in list. 6. Using dot syntax in unity script 7. Accessing components own variables and methods 8. Accessing another game objects and its components. 			
Module:6	State Machine for the game	16 hours	
<ol style="list-style-type: none"> 1. Setting up the state manager controller 2. Modify the state manager 3. Adding OnGUI() to state manager 4. Creating a button to pause the game 5. Destroying and keeping the game objects of the scene 			
Module:7	Movement and Collision scripts	15 hours	
<ol style="list-style-type: none"> 1. Moving the players using rigid bodies 2. Creating and loading prefabs using scripts 3. Creating scores for winning the games 4. Creating player script. 			
Module:8	Player Scripts	15 hours	
<ol style="list-style-type: none"> 1. Firing a bullet in the game 2. Rapid firing the enemy 3. Player's animation trigger scripts 4. Controlling player movements through script. 			
		Total Laboratory hours:	120 hours
Text Book(s)			
1.	Terry Norton, "Learning C# by Developing Games with Unity 3D Beginner's Guide", second edition, Packt Publishing Limited, 2015.		
Reference Books			
1.	Michelle menard, "Game development with unity" 2 nd edition, Cengage Learning PTR, 2015.		
Mode of Evaluation: Assignment / FAT / Project			
J Component Project (Samples)			
1.	Tap The Bottle – Android Game		
2.	Seed – Android Game		
3.	Boo Hunt – PC Game		
4.	Tap to Survive – Android Game		
5.	Pirate Escape – PC Game

MMA2008	UX Design	3	0	0	0	3
Pre-requisite	MMA1006	Syllabus version				
Course Objectives:						
The course is aimed at:						
<ol style="list-style-type: none"> 1. Learning the User Experience. 2. Various components, Tools and methods of UX. 3. Design components in web and mobile applications. 						
Expected Course Outcome:						
At the end of the course the student should be able to,						
<ol style="list-style-type: none"> 1. Understand User Experience and its process. 2. Understanding and meeting the required standard set of elements to find the need of customer sampling. 3. Creating design elements according to the target audience. 4. Justify archiving techniques according to user proforma. 5. Ability to line-up design principles on user comments. 						
Module:1	User experience and why it matters.	4 hours				
<ol style="list-style-type: none"> 1. Everyday Mysteries. 2. Introducing User Experience. 3. From product design to User Experience Design. 4. Designing for Experience. 5. Use Matters. 6. User Experience and the Web. 7. Good User Experience Is Good Business. 						
Module:2	Meet The Elements.	5 hours				
<ol style="list-style-type: none"> 1. The Five Planes. 2. Building from Bottom to Top. 3. A Basic Duality. 4. The Elements of User Experience. 5. Using the Elements. 						
Module:3	The strategy plane.	7 hours				
<ol style="list-style-type: none"> 1. Defining the strategy. 2. Product Objectives. 3. User Needs. 4. Team Roles and Process. 						
Module:4	The scope plane.	7 hours				
<ol style="list-style-type: none"> 1. Defining the Scope. 2. Functionality and Content. 3. Defining Requirements. 4. Functional Specifications. 						

5. Content Requirements.		
6. Prioritizing Requirements.		
Module:5	The structure plane.	6 hours
1. Defining the Structure. 2. Interaction Design. 3. Information Architecture. 4. Team Roles and Process.		
Module:6	The skeleton plane.	7 hours
1. Defining the Skeleton. 2. Convention and Metaphor. 3. Interface Design. 4. Information Design. 5. Wireframe.		
Module:7	The surface plane.	7 hours
1. Defining the Surface. 2. Making Sense of the Senses. 3. Follow the Eye. 4. Contrast and Uniformity. 5. Internal and External Consistency. 6. Color Palettes and Typography. 7. Design Comps and Styles Guides. 8. The Elements Applied. 9. Asking the Right Questions. 10. The Marathon and the Sprint		
Module:8	Industrial expert will give her view in project as assigned and discussion over recent trend scenario in UX view. - Case Studies	2 hours
Total Lecture hours:		45 hours
# Mode: Flipped Class Room, [Lecture to be videotaped], Use of physical and computer models to lecture, Visit to Industry, Min of 2 lectures by industry experts		
Text Book(s)

Course code		L	T	P	J	C
MMA3004	Advanced 3D Animation	0	0	8	4	5
Pre-requisite	MMA3002	Syllabus version				
Course Objectives:						
The course is aimed at: <ol style="list-style-type: none"> 1. Developing more sophisticated skills for character performance 2. Experimenting with both realistic and highly exaggerated styles of animation 3. Identifying professional practices and standards in animation industry, while creating Demo-reel. 						
Expected Course Outcome:						
By the end of course, student should be able to: <ol style="list-style-type: none"> 1. Understand 3D animations' production pipeline. 2. Strengthen animation skills by exploring methods for creating movements. 3. Analyze methods for creating solid acting choices that are unique and interesting. 4. Evaluating animations based on various principles of animation. 5. Create an independent animated project from start to completion in production standard. 						
Module:1	Analysing the cartoon and the modern era	15 hours				
<ul style="list-style-type: none"> • Sampling of great Mickey Mouse, Character and personality, construction, handling of mickey in animation. 						
Module:2	Understanding and Creating Experiment on camera staging according to the storyboard.	15 hours				
<ul style="list-style-type: none"> • Understanding the staging techniques of camera setup character setup. • Understanding the staging techniques of character setup and props, background. 						
Module:3	Understanding and Creating different rough walk cycle on paper using humanoid 3d Character stylized walk.	10 hours				
<ul style="list-style-type: none"> • Understanding the stylized walk cycle techniques and drawing the smart scribbles for sketch segmentation thumbnail of the stylized walk cycle. • Drawing the stylized walk cycle • Finalizing stylized walk cycle concept. 						
Module:4	Construction a story based concept action sequence involving humanoid 3d Character.	13 hours				
<ul style="list-style-type: none"> • Thinking of innovative ideas of the story building. • Constructing the story with iteration before quality pass. • Finalizing the story. • Drawing the storyboard for finalized concept and finding adaptive 3D humanoid character. 						

Module:5	Key frame, Creating 3D layout according to the storyboard.	07 hours
<ul style="list-style-type: none"> ● Creating the 3d layout based on storyboard. ● Creating the 3d character layout, camera layout according to the storyboard. ● Making iteration in keying on layout and finalization of the layout work in software. ● Making blocking and finalize the blocking for approval. 		
Module:6	Creating references for animation in method acting.	08 hours
<ul style="list-style-type: none"> ● The task of acting it gets exact reference for their own story. ● Creating different kinds of acting and finalizing. ● Based the finalized act, student will proceed to 3d software animation 		
Module:7	Understanding the timing and mood of character.	05 hours
<ul style="list-style-type: none"> ● Choosing the timing according to the story. ● According to story, presenting and creating the mood for the environment. 		
Module:8	Creating emotion	12 hours
<ul style="list-style-type: none"> ● Action and reaction of the character. ● Feeling of the character. 		
Module:9	Key frame, Creating a blocking stage on humanoid 3d Character timing and acting sequence 1.	05 hours
<ul style="list-style-type: none"> ● Based on story and the acting reference the block the humanoid 3d Character. ● Making iteration in keying on blocking stage and finalization. ● Making blocking poses and finalizes the blocking for approval. ● Creating the rough animation and in-betweens in blocking for approval. ● Finalizing the blocking based on story. 		
Module:10	Creating an intermediate stage for humanoid 3d character timing and acting sequence 2.	05 hours
<ul style="list-style-type: none"> ● Making iteration in keying on blocking pass for more detail work of art. ● Making intermediate pass for smoother follow of action. ● Final output of the acting animation. 		
Module:11	Micro and Macro correction over finalized 3d animation for timing.	04 hours
<ul style="list-style-type: none"> ● Applying principles according to the timing needs and for giving more detail attraction over the humanoid 3d Character. ● Quality passes for final output. 		

<ul style="list-style-type: none"> • Understanding and implementing the timing over character to show the mood. • Creating facial expression on humanoid 3D Character. 			
Module:12	Creating lip sync on humanoid 3d Character.	05 hours	
<ul style="list-style-type: none"> • Understanding the principle lip sync • Shooting the lip sync action according to the own story, drawing the lip sync action to execute as lip sync expression. • Implementing and transformation of action to humanoid 3d Character. • Adding additional smooth pass (secondary action) for approval. • Final rendered output of the acting animation. 			
Module:13	Creating an animated short story.	14 hours	
<ul style="list-style-type: none"> • Quality passes on the final output. • Redefining the change on the character animation. • Final quality passes on the output of character animation. • Render output. 			
		Total Laboratory hours:	120 hours

MMA3005	Scripting and Storyboarding Techniques	0	0	8	4	5
Pre-requisite	MMA2001	Syllabus version				
		v				
Course Objectives:						
The course is aimed:						
<ol style="list-style-type: none"> 1. To provide a comprehensive introduction to scripting and storyboarding techniques. 2. To understand the basic techniques of writing script out of a story. 3. To understand the basic techniques of making storyboard out of a script. 						
Expected Course Outcome:						
At the end of the course the student should be able to:						
<ol style="list-style-type: none"> 1. Understand the various techniques of writing a script and storyboard out of a given concept. 2. Acquire knowledge and idea about various types of script and storyboarding techniques. 3. Imply the gathered knowledge to write script and storyboard in the industry for animation and related areas. 4. Understanding and implementing the framing of story, script and character for short movie. 5. Ability to create industry standard portfolios. 						
Module:1	Story writing concepts	12 hours				
<ol style="list-style-type: none"> 1. Developing a story from a one liner or a concept 2. Understanding the story writing: anatomy of the story: beginning, middle and end 3. Write an original story out of an given basic idea(love, peace, tragedy etc) 						
Module:2	Screenplay	12 hours				
<ol style="list-style-type: none"> 1. Understanding screenplay, the anatomy and structure of a screenplay 2. Developing a screenplay from a given short story 3. Developing a screenplay with proper details out of the original story written by the student 						
Module:3	Camera shots	16 hours				
<ol style="list-style-type: none"> 1. Understanding camera angles: case study 2. Understanding camera shots: case study 3. Understanding camera transition: case study 4. Understanding scene transition: case study 						
Module:4	Animation film screenplay	8 hours				
<ol style="list-style-type: none"> 1. Develop a short animation film story with proper anatomy (beginning, middle, end) 2. Develop the screenplay for the animation film marking each scene description, time, shots, dialogue etc. 						
Module:5	Advertisement film screenplay	8 hours				
<ol style="list-style-type: none"> 1. Develop a basic concept and story for a 30 sec commercial advertisement of any selected product 2. Develop the screenplay for the commercial advertisement marking each scene description, time, shots, dialogues etc. 						

Module:6	Documentary film screenplay	8 hours
<ol style="list-style-type: none"> 1. Develop the idea and concept about the subject of the documentary film 2. Develop the basic screenplay for the documentary marking the scenes, camera angles, bgm etc. 		
Module:7	Storyboarding	12 hours
<ol style="list-style-type: none"> 1. Understanding different storyboarding techniques 2. Develop storyboard in given module with details of camera angles and transitions 3. Develop 20 panel storyboard out of any existing story or screenplay in pencil drawing 		
Module:8	Storyboarding from screenplay	16 hours
<ol style="list-style-type: none"> 1. Develop the required storyboard in proper panels and in details from the screenplay made for animation 2. Develop the required storyboard in proper panels and in details from the screenplay made for commercial advertisement 3. Develop the required storyboard in proper panels and in details from the screenplay made for documentary film 		
Module:9	Three types of storyboarding(minimum 30 panels)	16 hours
<ol style="list-style-type: none"> 1. Develop a basic storyboard with stick figures and rough drawings showing camera movements and transition 2. Develop a detailed storyboard in color with background and character details showing camera movements and transition 3. Develop a collage storyboard mainly used for commercial advertisement purpose 		
Module:10	Complete pipe line of pre-production	12 hours
<ol style="list-style-type: none"> 1. Develop and get approved an idea for a short animation film/advertisement/documentary 2. Develop and get approved the story out of the idea for a short animation film/advertisement/documentary 3. Develop the detail storyboard from the story out of the idea for a short animation film/advertisement/documentary 		
Total Laboratory hours:		120 hours

MMA3006		L	T	P	J	C
	DIGITAL CINEMATOGRAPHY	0	0	6	4	4
Pre-requisite	MMA2004	Syllabus version				
Course Objectives:						
1.To understand the functional working of a video camera 2.To learn the Art of Film Making and its nuances. 3.To create a story and tell it convincingly to the audience using various techniques related to cinematography, editing and sound effects.						
Expected Course Outcome:						
At the end of the course the student should be able to						
1.Operate a Video Camera, Video Lights and its related accessories. 2.Analyse and infer various conditions, preparations and environments for shooting a short film. 3.Appraise short films based on Shots, Continuity, Dialogue, Lighting, Audio and Effects. 4.Visualize concepts, ideas or a story based on a theme or a one-liner. 5.Plan the requirements (Story, Script, Storyboard) and complete a successful Documentary / Short Film.						
Module:1	Basics of Video Camera	10 Hours				
Basics of video camera and how to handle it Various Shooting modes in Video Camera and 3 Point Lighting using Video Lights To Creating a Concept for a short film						
Module:2	Short Film - One Liner & Script	10 Hours				
Analyzing few examples of one liner Writing an own one liner script.						
Module:3	Short Film - One liner:	10 Hours				
Writing a Story and characterization of the story. Choose Character & Location Selection for Shooting in the VIT campus						
Module:4	Short Film - Dialogue & Story Development:	10 Hours				
Writing Dialogue for the story. Create and segment Shot, Scene & sequence for the story.						
Module:5	Short Film - Screenplay & Storyboard	10 Hours				
Planning the storyboard Preparing a storyboard for Video Shoot Production Planning and will book the camera for his/ her shoot.						
Module:6	Short Film - Lighting & Camera Angle:	10 Hours				
Location Management The student will submit the equipment list needed for his shoot. The student will set the lighting and camera angle according to the shot and make a shooting script						

Module:7	Short Film - Continuity & Acting:	10 Hours
Preparing cue sheet for the editing Making note of information of their day one shoot and make sure they don't miss the continuity		
Module:8	Short Film - Editing & Effect:	10 Hours
Capturing the rushes using cord and editing software Finish of shooting and take the rushes to editing to sequence it and finalizing the real cuts. Order the sequence according to the story and add effects, transitions, voice overs, subtitles and credit on his own creativity.		
Module:9	Short Film - Output Submission	10 Hours
Render out the full short film. Document the film in cd and submit it for screening. Experts review the films and lectures.		
Total Laboratory Hours:		90 Hours

Course code		L	T	P	J	C
MMA3007	RIGGING	0	0	8	4	5
Pre-requisite	MMA2001	Syllabus version				
Course Objectives:						
The course is aimed,						
<ol style="list-style-type: none"> 1. To study the organic and inorganic rigging of humans and machines. 2. To understand advanced techniques for organic rigs such as blend shape and facial expression setups. 3. To apply advanced techniques for complicated mechanical rigging setups by implementing dynamics in rigging. 						
Expected Course Outcome:						
At the end of the course the student should be able to						
<ol style="list-style-type: none"> 1. Expand their basic rigging skills and understanding of tools and techniques related to rigging 3D models. 2. Understand and incorporate various industry-standard rigging techniques. 3. Justify advance techniques and methodologies of 3d character rigging. 4. Develop the understanding about skeletal rigging. 5. Ability to troubleshoot common rigging challenges. 						
Module:1	Basic Bone and IK setup	15 hours				
<ol style="list-style-type: none"> 1. Anatomy of a joint to create a skeleton form 2. Local rotation axes, parenting & un parenting the joints 3. Applying forward and inverse kinematics for a 3D character 4. Node functions of Hypergraph and outliner 5. Joint setup for a biped character. 						
Module:2	3D Character Rig using FK/IK techniques	10 hours				
<ol style="list-style-type: none"> 1. Creation of a biped character with full skeleton structure 2. Applying FK and IK for the character. 3. Applying Spline IK handle tool and cluster for biped character 4. Adding addition joints for detail deformation. 						
Module:3	Linking Attributes of the character rig	15 hours				
<ol style="list-style-type: none"> 1. Connecting objects using connection editor. 2. Attributes creation and connection using set driven key controls. 3. Joints animation using set driven key technique. 4. Point, Orient and Parent Constraints and its limitations in connecting the 3d objects. 5. Control curves for control the skeleton structure. 						
Module:4	Biped Binding and Editing Skin weights	10 hours				
<ol style="list-style-type: none"> 1. Reverse foot technique and pole vector for rigging the leg. 2. Mesh binding using smooth skinning and Interactive Binding methods. 3. Paint skin weights on the mesh for better skinning. 4. Skin weight editing and transfer using other tools. 5. Robot rigging techniques and binding methods. 						

Module:5	Advanced Rigging using MEL and Python scripts	15 hours
<ol style="list-style-type: none"> 1. Stretchy IK and skeletal structures using MEL scripts. 2. IK/FK switch setup for rigging the hand in Maya. 3. Scripting joints and controls using MEL commands. 4. Creating and editing expressions for advance setup. 		
Module:6	Facial Rigging techniques	15 hours
<ol style="list-style-type: none"> 1. Joint setup for facial Rigging. 2. Aim constraint for Eyeball movements in facial rig 3. Creating various expressions for facial setup. Expressions. 4. Creating lip-sync deformers for animation audio synchronization. 5. Editing skin 6. Blend deformer for merging the character facial 7. Weights tool using component editor. 		
Module:7	Rigging a Car with deformers and controls.	15 hours
<ol style="list-style-type: none"> 1. Deformers for editing mesh shapes and structures. 2. Rigging a car by creating groups and Controls using driven keys 3. Lattice deformer for car tires deformation 4. Rigging properties using joint and constraints. 		
Module:8	Animal Rigging and skinning techniques.	10 hours
<ol style="list-style-type: none"> 1. Quadruped skeleton character structure. 2. Quadruped skinning and editing skin weights-1 3. Quadruped skinning and editing skin weights-2 4. Creating control curves and constraints for quadruped rigging. 5. Creating an overall control curve for the character rig. 		
Module:9	Designing Custom Rigs using animation.	15 hours
<ol style="list-style-type: none"> 1. Muscle setup and deformation using Muscle deformer. 2. Creating and editing character set for rigging 3. Character References for rigs to optimize animation and scene 4. Rigging a snake using the spline IK and constraints. 5. Exporting and importing character rigs for external applications. 6. A full body character control rig with all controls

Course code		L	T	P	J	C
MMA3008	ADVANCED MODELING	0	0	8	4	5
Pre-requisite	MMA3001	Syllabus version				
Course Objectives:						
The course is aimed						
<ol style="list-style-type: none"> 1. To gain good knowledge to create organic modeling. 2. To apply experimental production techniques for organic modelling. 3. To explore the advanced techniques in polygon based Modeling. 						
Expected Course Outcome:						
At the end of the course the student should be able to						
<ol style="list-style-type: none"> 1. Create a model of their own and texture it appropriately. 2. Generate character models with proper topology and anatomy. 3. Create set models with proper measurements based on real world scaling. 4. Differentiate the pros & cons of triangulating polygons. 5. Develop detailed shaders with available shading network. 						
Module:1 Introduction						
					15 hours	
<ol style="list-style-type: none"> 1. Review of the Maya GUI. 2. Review fundamental Modeling techniques. 3. Modeling a human hand. 4. Adding detail to the hand model. 5. Creating skin texture in image editing software. 						
Module:2 Modeling with NURBS						
					10 hours	
<ol style="list-style-type: none"> 1. NURBS components (Control Vertices, Hulls, Spans/Sections, Curve Degree, Edit Points, U and V coordinates). 2. Curve-based Modeling concepts and techniques. 						
Module:3 Modeling with polygons						
					15 hours	
<ol style="list-style-type: none"> 1. Setting up a scene for modeling. 2. T-pose vs. Relaxed Pose. 3. Image planes. 4. Mesh topology. 5. Quad's (4-sided) vs. Tri's (3-sided) vs. multi-sided faces. 6. Complicated meshes and Boolean Modeling operations. 						
Module:4 Modeling and Texturing a Character with NURBS.						
					15 hours	
<ol style="list-style-type: none"> 1. NURBS Topology. 2. Modeling with Profile Curves. 3. Tools and Methods. 4. Designing and Modeling a Character with NURBS. 						
Module:5 Modeling cleanup						
					10 hours	

<ol style="list-style-type: none"> 1. NURBS to polygon conversion 2. Polygon Cleanup. 3. Naming conventions, parenting, hierarchies, and naming conventions. 		
Module:6	Modeling & Texturing a Simple Character with Polygons	15 hours
<ol style="list-style-type: none"> 1. Modeling with Polygon Tools. 2. Working with Symmetry. 3. Using Image Planes and Block Modeling. 4. Sculpting the Character. 5. UV Texturing. 		
Module:7	UV unwrapping and texturing	15 hours
<ol style="list-style-type: none"> 1. UV Coordinates. 2. UV Projections and unwrapping. 3. NURBS vs. polygon UV coordinate space. 4. Exporting UV snapshots to Photoshop. 5. Materials Fundamentals. 		
Module:8	Materials and texturing	10 hours
<ol style="list-style-type: none"> 1. Materials and Shaders. 2. Hypershade. 3. Standard shading attributes. 4. Bump maps, normal maps, and displacement maps. 5. Procedural vs. image-based texture nodes. 6. Layered and specialty shaders. 		
Module:9	Designing a Humanoid and Modeling the Head	15 hours
<ol style="list-style-type: none"> 1. Human Anatomy for Modelers. 2. Using Distortions for Artistic Purposes. 3. Methods and Tools. 4. Blocking the Torso and Limbs. 5. Shaping and Refining the Torso and Limbs. 6. Testing Geometry Deformation. 7. UV Mapping. 8. Bump maps, normal maps, and displacement maps. 9. Creating texture using image editing software.

J Component Project (Samples)		
1.	Ancient Characters for game	

2.	Sci-fi Characters for game		
3.	Creature modeling – Concepts		
4.	Historical Environment - Assets		
5.	Sci-fi City – Assets		
Mode of evaluation: Reviews			
Recommended by Board of Studies		12.8.2017	
Approved by Academic Council		No. 47	Date 5.10.2017

Course code		L	T	P	J	C
MMA3009	ADVANCED FILM MAKING	0	0	8	4	5
Pre-requisite	MMA3006	Syllabus version				
		v. XX.XX				
Course Objectives:						
1.To learn the Art of Professional Film Making 2.To learn and understand the Art of Storytelling through Visuals and Acting. 3.To learn the handling of Professional Videography Equipments for Film Making.						
Expected Course Outcome:						
At the end of the course the student should be able to, 1. Operate Professional Video Camera, Cine Lenses and its related accessories along with Color Grading. 2. Analyse the Cast, Crew requirements along with various preparations and environments for shooting a professional short film. 3. Appraise short films based on Emotion, Psychology, Acting, Performance and Culture. 4. Visualize concepts, ideas or a story based on a theme or a one-liner. 5. Plan the requirements (Story, Script, Storyboard, Dialogue, Continuity, Prop & Assets, Budget, Shoot Schedule) and complete a successful Documentary / Short Film / Feature Film.						
Module:1	Basics of Video Camera	12 Hours				
Basics of Film Camera; Film Camera Handling; Setting ISO for various Shots; Setting Iris (Aperture) for various Shots; Setting Shutter Speed for various Shots; Setting White & Black Balance for various Shots; Steady-Cam Rig Operation; Slider Operation; Handling CP2 Lenses; Fixing the Video Camera in the Shoulder Rig; Fixing and handling the Follow Focus System; Fixing the Matte Box and LCD Display; Various Film Recording Formats; Using a Track and Trolley						
Module:2	Concept and Budget	10 Hours				
Concept or Idea Generation; Writing a Documentary ;Budgeting for a Short Film						
Module:3	Script:	10 Hours				
Professional Script Writing; Writing an Effective Screenplay; Production Logs and its Types; Choosing the Various Video Filters; Color Correction & Color Grading						
Module:4	Storyboard:	10 Hours				
Storyboarding for Film; Characterization; Crew & Casting; Production Planning						
Module:5	Dialogue:	10 Hours				
Dialogue Writing; Continuity and Hook Up; Shooting Script						
Module:6	Acting:	10 Hours				
Location Management; Costume for Actors; Dubbing & Voice Over; Foley and Special Effects; Body language for Actors (rehearsals); Dialogue Delivery						
Module:7	Composition:	10 Hours				

Properties & Asset Management; Background Music for the Film; Sound Effects for Film			
Module:8	Lighting:		10 Hours
Location Lighting and Light Continuity; Lighting for various Mood.			
Module:9	Editing		10 Hours
Capturing the rushes using cord and editing software Finish of shooting and take the rushes to editing to sequence it and finalizing the real cuts. Visual Effects Order the sequence according to the story and add effects, transitions, voice overs, subtitles and credit on his own creativity.			
Module:10	Final Presentation:		10 Hours
Film Distribution			
	Total Laboratory Hours:		120 Hours
Text Book(s)			
1.	Directing: Film Techniques & Aesthetics 5 th Edition by Michael Rabiger and Mick Hurbis-Cherrier (Focal Press (2013)		
Reference Books			
1.	Cinematography: Theory & Practice: Image Making for Cinematographers and Directors 2 nd Edition by Blain Brown (Focal Press – 2011)		
Mode of Evaluation: Assignment / FAT			
J Component Project (Sample)			
1.	Handling Film Camera, Cine lenses and Cine Equipments.		
2.	Developing a Story based on One Liner / Concept		
3.	Creating Script / Storyboard for the concept along with Dialogue, Continuity, Prop & Assets		
4.	Video Shoot of The Concept based on Storyboard		
5.	Editing and Submitting the Final Output as a Short Film / Documentary		
Mode of evaluation: Reviews			
Recommended by Board of Studies		12-06-2015	
Approved by Academic Council		No. 37	Date 16-06-2015

Course code		L	T	P	J	C
MMA3010	Video Editing & Digital Intermediate	0	0	8	4	5
Pre-requisite	MMA3006	Syllabus version				
Course Objectives:						
The course is aimed :						
<ol style="list-style-type: none"> 1. To understand the developing process of making movies. 2. To Acquire the knowledge of basic storyboarding to prepare for a movie using editing software 3. To practice the categories in compositing process. 						
Expected Course Outcome:						
At the end of the course student should be able to :						
<ol style="list-style-type: none"> 1. Understand on the latest techniques in editing. 2. Analyze the stages of Pre-production, Production and Post-Production of editing techniques. 3. Develop the method to visualize and create their own video logs and short-films. 4. Understand the fundamental terminologies and concepts of Non-Linear editing. 5. Develop an understanding of the basics of camera technology, sound, microphones, shooting techniques necessary to understand the editing process 						
Module:1	Editing Software	15 hours				
<ol style="list-style-type: none"> 1. Understanding the interface video editing software. 2. Creating a new project and importing video footage into the bin and labelling them. 3. Setting up a mark in & mark out in source monitor and inserting the video into timeline. 						
Module:2	Cut to Cut	15 hours				
<ol style="list-style-type: none"> 1. Applying the techniques of cut to cut and cutaway. 2. Applying the techniques of jump cut. 3. Creating a match cut for the video footage. 						
Module:3	Audio Editing	15 hours				
<ol style="list-style-type: none"> 1. Recording audio formats. 2. Editing recorded audio using audio editing software. 3. Adding audio effects to the clips to sync with the video files. 4. Creating an audio sync using audio transitions method. 						
Module:4	Special Effects	15 hours				
<ol style="list-style-type: none"> 1. Applying special effects to the video clips placed on the timeline. 2. Creating special transitions to the video clips placed on the timeline. 3. Adding title to the desired video clip. 						
Module:5	Titling	15 hours				
<ol style="list-style-type: none"> 1. Creating titling animation for a Trailer. 2. Creating titling animation for a Video Song. 						

3. Creating a complete video song with lyrics.			
4. Creating a start & end titles /credits title for a short-film.			
Module:6	Advanced Titling	15 hours	
1. Titling - Rolling			
2. Titling - Crawling			
3. Slip Edit Trimming			
4. Slide Edit Trimming			
Module:7	Animation	10 hours	
1. Animation - Speed Duration			
2. Animation - Setting keys for animation			
3. Animation - Multiple Techniques			
Module:8	Video Transitions	10 hours	
1. Transitions - Working on Zoom & Dissolve Transition			
2. Transitions - Working on Page Peel & Slide Transition			
3. Transitions - Working on Stretch & Wipe Transition			
Module:9	Video Effects	10 hours	
1. Chroma Key - Editing a green/blue matte video footage with key effects.			
2. Creating different effects to video clips using distort effects			
3. Altering color correction and grading to video clips based on the scene.			
		Total laboratory hours:	120 hours
Text Book(s)			
1.	Andrew Faulkner, "Adobe Premiere Pro CC Classroom", 1st edition, Adobe Press, 2017.		
Reference Books			
1.	Aaron Goold, "The Video Editing Handbook", 1st edition, Independently published, 2017		
Mode of Evaluation: Assignment / FAT

2.	Documentary Project		
3.	Promotion & Ad Film project		
4.	Title effects Project		
5.	Creative editing project		
Mode of evaluation: Reviews			
Recommended by Board of Studies		12.6.2015	
Approved by Academic Council		No. 37	Date 16.6.2015

Course code		L	T	P	J	C
MMA3011	Advanced Compositing & Dynamics	0	0	8	4	5
Pre-requisite	MMA3003	Syllabus version				
Course Objectives:						
The Course is aimed :						
<ol style="list-style-type: none"> 1. To focus on efficiency of workflow, troubleshooting skills, and maintaining the image quality. 2. To comprehend advanced keying techniques, color space and 3D tracking. 3. To learn the Advanced compositing using Node based software. 						
Expected Course Outcome:						
At the end of the course student should be able to :						
<ol style="list-style-type: none"> 1. Create an effective digital media portfolio project. 2. Combine digital effects and elements' towards visual believability and consistency. 3. Identify major applications of compositing process used in industry. 4. Ability to improve workflow and solve advanced compositing challenges. 5. Developing an effective 3D Compositing pipeline. 						
Module:1	Working with Nodes	15 hours				
<ol style="list-style-type: none"> 1. Adding and editing nodes. 2. Loading images in to the scene. 3. Transformations and editing footage settings 4. Building node trees and making connections 5. Merging the nodes to the viewer and editing viewer properties 						
Module:2	Color Correction and Grading:	15 hours				
<ol style="list-style-type: none"> 1. Basic Color correction for the footages. 2. Color grading using Grade node. 						
Module:3	Tracking & Stabilization:	15 hours				
<ol style="list-style-type: none"> 1. Tracking: Tracking preferences and viewer tools 2. Stabilization using transform, Rotation & Scaling. 3. Automatic versus Manual Tracking 4. Corner pin 2D for Match moving 5. Transforming masks with tracking data 6. To analyze and fix the jitter in the video 						
Module:4	Rotoscopy and wire removal	15 hours				
<ol style="list-style-type: none"> 1. Creating Roto for the image and for the video 2. Working with channels and RGB 3. Working with Stroke and shape list 4. Curve editor and Dope sheet for animation 						
Module:5	Matte Removal:	15 hours				
<ol style="list-style-type: none"> 1. Keying techniques – with Keylight 2. Keying techniques- with Primatte 3. Keying techniques- with ultimate 						

Module:6	Stereoscopic Effect:	15 hours	
1. Loading multiple views in to the scene 2. Splitting and merging of footages in the scene 3. Usage of Anaglyph to create stereoscopic effect 4. Shuffle views, join views and fixing the views 5. Rendering the stereoscopic scene			
Module:7	3D Compositing:	10 hours	
1. Setting up a 3D scene 2. Using 3D viewer 3. Setting up the 3D geometry for 3D compositing 4. Applying texture and materials for the geometry 5. Creation of custom camera and light settings in the scene			
Module:8	Live Action Compositing:	10 hours	
1. 3D Set Extension using compositing 3. Wire removal using the video footage 4. Matte removal using the keying techniques 5. Integration of 3rd party 3D tools for advance compositing.			
Module:9	Particles & Python Scripting:	10 hours	
1. Gizmos and basic python expressions 2. Customizing the nodes using python scripts 3. Creating custom panels and advance compositing 4. Creating particles using emitter 5. Properties of particles and effects in Python 6. Effects: Wind, Turbulence, Gravity 7. Particle direction and bounce on the surface 8. Expressions to change the flow of particles 9. Compositing the particles over the footage			
		Total laboratory hours:	120 hours

MMA3012	Artificial Intelligence For Games	3	0	0	0	3
Pre-requisite	MMA2007	Syllabus version				
Course Objectives:						
<p>This course is aimed:</p> <ol style="list-style-type: none"> 1. To familiarize students with techniques and issues of Artificial Intelligence (AI) for computer games 2. To discuss the nature of path-finding in video games. 3. To demonstrate the application of physics in game environment towards achieving realism. 						
Expected Course Outcome:						
<p>By the end of the course, students should be able to:</p> <ol style="list-style-type: none"> 1. Identify aspects of computer games, which benefit from artificial intelligence. 2. Implement artificial intelligence and machine learning techniques for traditional and modern computer games. 3. Define the importance of physics and collision in game creation. 4. Create custom navigation using path-finding algorithms. 5. Demonstrate their skills in handling game engines for AI tasks. 						
Module:1	AI And Games	7 hours				
<p>Game AI, Model of Game AI, Algorithms, Data Structures and Representations, Kinds OF AI in Games, Speed and Memory-Processor issues, Memory concerns, PC & console constraints, The AI Engine-Structure of AI Engine, Tool chain concerns.</p>						
Module:2	Motor Control & Movements	5 hours				
<p>Basics of Movement Algorithm – Two dimensional movement, Statics, Kinematics, Steering Behaviors – Variable matching</p>						
Module:3	Physics and Collisions	5 hours				
<p>Path following, Collision avoidance, Predicting physics, Jumping & Motor Control, Movement in 3rd Dimension.</p>						
Module:4	Path Finding	6 hours				
<p>Graphs, Weighted Graphs, Cost functions, Path smoothing, Open Goal pathfinding, Dynamic pathfinding, Continuous time pathfinding, Movement Planning</p>						
Module:5	Trees and algorithms:	6 hours				
<p>Decision Trees – Problem- algorithm - Pseudo code - Implementation, State Machines, Behavior trees – Fuzzy Logic, Markov Systems.</p>						

Module:6	Decision Making	7 hours
Goal Oriented, Rule based systems, Scripting, Board Game Theory, Minimizing, Transposition tables and memory, Turn based strategy in board games.		
Module:7	Designing AI:	7 hours
Scheduling execution. Level Of Detail, The Design, Shooters, Driving, Real-Time strategy, Sports, Turn based strategy games, AI Based Game Genres.		
Module:8	Expert talk on recent advancements in Games & Artificial intelligence	2 hours
Total Lecture hours:		45 hours
# Mode: Flipped Class Room, [Lecture to be videotaped], Use of physical and computer models to lecture, Visit to Industry, Min of 2 lectures by industry experts

MMA3013	Architectural Visualization	0	0	8	4	5
Pre-requisite	MMA1003	Syllabus version				
Course Objectives:						
Course is aimed at:						
<ol style="list-style-type: none"> 1. Gaining basic concepts and understanding of tools related to 3D production. 2. Become comfortable with basics of modeling, lighting, texturing and rendering. 3. Understanding the fundamentals of strong 3D design. 						
Expected Course Outcome:						
At the end of the course, students should be able to:						
<ol style="list-style-type: none"> 1. Create a 3D architectural model and site model of moderate complexity. 2. Develop and apply realistic textures to a 3D model. 3. Ability to use both natural and artificial lighting techniques. 4. Demonstrate a working understanding of image editing and post production tools used in the architectural visualization industry. 5. Demonstrate an intermediate level of skill in the use of 3D modeling, rendering, animation and post production applications to complete a design visualization project. 						
Module:1	Introduction to work area	15 Hours				
<ol style="list-style-type: none"> 1. User interface, user interface components. 2. Viewports, viewports configuration. 3. Working in the user interface. 4. Creating objects, quad menu. 5. Aligning objects, reference coordinate system. 						
Module:2	Shapes and Editable Poly	15 hours				
<ol style="list-style-type: none"> 1. Creating shapes, editable splines. 2. Working with extrude modifier, taper modifier, lathe modifier. 						
Module:3	Creating the plane, Compound objects, Material	15 hours				
<ol style="list-style-type: none"> 1. Creating the plan, Boolean compound object. 2. Working with pro Boolean, terrain. 3. Using the scatter compound object, loft compound object. 4. Working with deformations, deform scale, shape merge. 5. Types of materials, shaders, naming materials. 6. UVW map modifier, applying architectural material. 						
Module:4	Sketch Exercise 1 (Exterior)	15 hours				
<ol style="list-style-type: none"> 1. Solid Modeling, Extrusions and Booleans 						

	<ol style="list-style-type: none"> 2. Mesh Modeling, Thicknesses and 3D Faces 3. Creating 3D blocks for Windows and Doors 4. Path Extrusions 	
Module:5	Importing AutoCAD to 3D Software	15 hours
	<ol style="list-style-type: none"> 1. Legacy Import. 2. Viewports and Creating Cameras. 3. Basic Rendering. 	
Module:6	Lighting and Exposure Control in 3D Software	12 hours
	<ol style="list-style-type: none"> 1. Creating Standard Lights. 2. Rendering Environment. 3. Rendering Background. 4. Daylighting System in 3D Software Design. 5. Exposure Control. 	
Module:7	Materials in 3D Software	11 hours
	<ol style="list-style-type: none"> 1. Material Types. 2. Material Editor (compact mode). 3. Material Parameters. 4. Applying materials from Libraries. 5. Creating custom Standard Materials. 6. Object Mapping Coordinates. 7. Bitmap Bump Mapping. 8. Procedural mapping. 9. Transparent and Reflective Materials. 	
Module:8	Test Rendering and Network Rendering	10 hours
	<ol style="list-style-type: none"> 1. Rendering Engine Options 2. Rendering Regions and Selected Objects 3. Mental Ray Indirect Illumination Parameters 4. Saving and Reusing Final Gather. 5. Generating Photon Maps 	
Module:9	Completion and Interior Lighting	12 hours
	<ol style="list-style-type: none"> 1. Enclosing teh Model to Avoid Light Leaks. 2. Utilizing Clipping Planes in with Cameras. 3. Importing or Merging Furniture. 4. Exterior Daylighting with Mental Ray Sky Portals 5. Interior Photometric Lights.

MMA2009		VIRTUAL REALITY					L	T	P	J	C
							3	0	2	0	4
Pre-requisite		MMA1003 – Design Fundamentals				Syllabus version					
						V. 1.0					
Course Objectives:											
<p>This course is aimed:</p> <ol style="list-style-type: none"> 1. To enable students to understand nuances of Virtual Reality. 2. To facilitate students to get well versed with varied applications of Virtual Reality. 3. To create virtual environments, applications and games. 											
Expected Course Outcome:											
<p>At the end of this course, the students will be able:</p> <ol style="list-style-type: none"> 1. To identify the appropriate policies and procedures of VR for optimal use, apply industry standards and best practice. 2. To discuss the various pros & cons of existing VR/AR technology. 3. To analyze and choose the appropriate VR implementation methodology based on the nature of the project. 4. To create new applications with VR/AR technology. 5. To apply knowledge and skills in creative ways to new situations in professional practice and/or further learning in the field of VR/AR. 											
Module:1	INTRODUCTION TO VIRTUAL REALITY					5 hours					
Definition and introduction – 3D animation and Augmented reality – Four Key Elements - Input devices – Output devices - Immersive and Non-Immersive Virtual Reality - Advantages & Disadvantages.											
Module:2	VR INTERACTION					6 hours					
Human Factors in VR-Methodology and Terminology-User Monitoring – Degrees of Freedom (DOF) - User Performance Studies-VR health and Safety Issues-VR and Society- Human-Computer Interaction – VR in psychology.											
Module:3	INTERFACE TO THE VIRTUAL WORLD					5 hours					
Glossary of VR terminology – Visual Displays - Head Mounts Display (HMD), Boom, Cave, Input Devices and Sensual Technology - Characteristic of Immersive VR Shared Virtual Environments											
Module:4	VR HARDWARE & INTEGRATION					6 hours					
Key Interactions: Manipulation, Navigation, and Communication - Trends in VR Hardware – Existing Hardware Technologies - Adaptability with Mobile devices-Visualization technology- VR with 3D-VR with Anaglyph											
Module:5	VR IN BUSINESS					7 hours					
VR for Everyone - Mainstream VR Business-Adoption in Gaming Industry-Entertainment-Sports- Feature Films-Retail-Social media-education.											
Module:6	VR VIDEOS AND STREAMING APPLICATIONS					7 hours					

Virtual surround sound-360 degree cameras-editing 360 videos-streaming- Virtual Reality Applications-Applications of Virtual Reality – Gesture Recognition -Education & training – Entertainment – Medical applications.

Module:7	VR AUTHORING	7 hours
-----------------	---------------------	----------------

Computational Fluid Dynamics (CFD) –Games– Virtual sets Costing – Virtual Reality Markup Language – Computing architecture for VR - Past, present & future of VR.

Module:8	FUTURE ADOPTATIONS OF VR/AR	2 hours
-----------------	------------------------------------	----------------

Emerging Fields in VR/AR –Industry Expert Talk

Total Lecture hours:	45 hours
-----------------------------	-----------------

Course Code	ADVANCED USER INTERFACE	L	T	P	J	C
MMA3014		0	0	8	4	5
Pre-requisite	MMA2006	Syllabus version				
Course Objectives:						
Course is aimed at:						
<ol style="list-style-type: none"> 1. Fundamentals of User Centred Design Process 2. Understand User Experience Design Process (Empathy, Define, Design, Prototype & Evaluate) 3. Analysis of a user interface from a communication perspective. 4. Educate about Sustainable, Speculative, Inclusive Design in Experience Design 						
Expected Course Outcome:						
At the end of course, students should be able to						
<ol style="list-style-type: none"> 1. Possess knowledge about the evolution of field of Interface design and its significance in today's context 2. Ability to identify the RIGHT PROBLEM/GAP/CHALLENGE/OPPORTUNITY to make user experience design intervention 3. Application of the learnt knowledge of User Interface Design process as a complete Project 4. Identify and apply suitable methods to convert user needs into designs. 5. Articulate the relevance of Sustainable, Speculative, Inclusive Design futures in Interface Design with emerging innovative technologies 						
Module:1	User Centered Design Process	15 Hours				
<ol style="list-style-type: none"> 1. Good and Poor Design 2. What Is Interaction Design? 3. The User Experience 4. Understanding Users 5. Accessibility and Inclusiveness 6. Usability and User Experience Goals 						
Module:2	Importance Of Conceptualizing	15 hours				
<ol style="list-style-type: none"> 1. Conceptualizing Interaction 2. Conceptual Models 3. Interface Metaphors 4. Interaction Types 5. Paradigms, Visions, Theories, Models, and Frameworks 						

Module:3	Identify The Right Problem/Gap/Challenge/Opportunity	15 hours
<ol style="list-style-type: none"> 1. What, How, and Why? 2. What Are Requirements? 3. Data Gathering for Requirements 4. Bringing Requirements to Life: Personas and Scenarios 5. Capturing Interaction with Use Cases 		
Module:4	Data Analysis and Interpretation	15 hours
<ol style="list-style-type: none"> 1. Quantitative and Qualitative 2. Basic Quantitative Analysis 3. Basic Qualitative Analysis 4. Which Kind of Analytic Framework to Use? 		
Module:5	UX Design Process (Empathy, Define, Design, Prototype & Evaluate)	15 hours
<ol style="list-style-type: none"> 1. Empathy and understanding problems 2. User Study – Contextual Enquiry 3. Define need for design intervention Data Analysis & Synthesis 4. Idea generation (Methods, Tools & Techniques) 		
Module:6	Innovations, Trends and best practices in Prototypes & Experience Evaluations	15 hours
<ol style="list-style-type: none"> 1. Prototypes (Low Fidelity) – Tools 2. Prototypes (High Fidelity) – Tools 3. Evaluate (Usability testing) – Methods & Principles 		
Module:7	Advanced user Tracking	15 hours
<ol style="list-style-type: none"> 1. Eye Tracking 2. Mouse Tracking 3. Responsive Design Evaluations 4. Evaluation summary 		
Module:8	Industry Experts' insight on Sustainable, Speculative & Inclusive Design	15 hours
Total Lab Hours: 120 hours
