

## Online hands-on workshop on "Sangers Sequencing Data Analysis & Mutation Analysis" organized by VIT-TBI

DNA sequencing is a technique used to determine the exact sequence of bases in a DNA molecule. With Next Generation Sequencing (NGS) sparks revolution, sangers sequencing was the first developed and still being imperative for the better understanding of the gene and genome.

The virtual workshop covers the basic concept together with hands-on experience on sangers sequence data analysis and mutation analysis with result interpretation using BioEdit tool.

E-certificate will be given to the participants upon successful completion.
