**ABOUT VELLORE INSTITUTE OF TECHNOLOGY**

VIT was established with the aim of providing quality higher education on par with international standards. It persistently seeks and adopts innovative methods to improve the quality of higher education on a consistent basis. The campus has a cosmopolitan atmosphere with students from all corners of the globe. Experienced and learned teachers are strongly encouraged to nurture the students. The global standards set at VIT in the field of teaching and research spur us on in our relentless pursuit of excellence. In fact, it has become a way of life for us. The highly motivated youngsters on the campus are a constant source of pride. Our Memoranda of Understanding with various international universities is our major strength. They provide for an exchange of students and faculty and encourage joint research projects for the mutual benefit of these universities. Many of our students, who pursue their research projects in foreign universities, bring high quality to their work and esteem to India and have done us proud. With steady steps, we continue our march forward. We look forward to meeting you here at VIT.

## About workshop

The "Industrial Applications of Artificial Intelligence" workshop covers key AI concepts, machine learning techniques, and real-world applications. Specifically, it delves into how AI revolutionizes the semiconductor industry by enhancing design, manufacturing, and quality control. It covers AI-driven techniques for chip design optimization, predictive maintenance in fabrication plants, defect detection, and yield improvement. Participants will explore real-world case studies and hands-on applications of machine learning and deep learning in semiconductor production. This workshop is ideal for engineers, researchers, and industry professionals looking to leverage AI for innovation and efficiency in semiconductor manufacturing.
