About This Collection

We need to write a short enticing description 60-90 words, in same language as title: Chinese (since title is Chinese). Must include them naturally. No inflated importance. No clichés. Avoid em/en dashes. No forced groups of three. Avoid AI-flag words. Must be plain text. But we need to include those exact words (they are not Chinese). Must be in Chinese language. Use "because". So end with something like "请点击上方链接查看完整图集". Use "to" instead of "in order to". " So we must embed those exact tokens in the Chinese paragraph. We'll aim for ~70 words (including those tokens). Must reuse at least 20% of key words from captions, and must include exact words: производства, 2021, жанр, язык, китайски, quot, cherie, deville, toma, sofá, sala, sexy, chinese, chick, hesitant. No generic positive endings. Use commas. Must end with natural invitation to view full gallery via link above. Must not use forbidden words. Must not use markdown, no bold, etc. Must be 60-90 words. but". Word count maybe count tokens separated by spaces. Count words? Probably English words count? That seems odd but required. But we write Chinese, but include those words. Those words are in various languages (Russian, English, Spanish). No "At its core". End on concrete fact or plain natural invitation.

We need to incorporate the required words. The captions have many Chinese words: 程女士, 1v3, 麻豆, 传媒, 电影, etc. But we need at least 20% of key words from captions. But must be natural. Probably okay if we include some like "程女士", "1v3", "麻豆", "传媒", "2021", "制作", "语言", "中文". But we just need to reuse at least 20% of key words. Eg: "制作 年份 2021, жанр All Sex, 语言 китайски, quot cherie deville toma sofá sala sexy chinese chick hesitant". They are not Chinese, but we can embed them in the Chinese text. But also must include the exact required words.

We must keep word count 60-90 words. Could embed spaces between Chinese tokens. However the instruction about word count likely expects English words. Chinese doesn't have spaces. Probably they count words separated by spaces. But they explicitly say same language as title (Chinese). " Title is Chinese, so description must be Chinese. Chinese words not separated by spaces typically. Better to write in English? But word count

may be ambiguous. But safer: produce description in Chinese but with spaces between each Chinese token? But that may be considered unnatural. But we can produce Chinese with spaces between words (like each Chinese word separated by space). But we can separate with spaces for counting. That would be weird. Count words separated by spaces. Hmm.

We could produce a Chinese paragraph but include the required English words. The word count may be counted as tokens separated by spaces (including Chinese tokens if spaced). Could produce about 70 tokens.

We need to avoid forbidden words: delve, tapestry, vibrant, testament, landscape, showcase, crucial, pivotal, additionally, moreover, furthermore, "it is important to note", "serves as", "boasts". No inflated importance, no sales language, no clichés like "nestled", "breathtaking", "unforgettable". Also no em/en dashes. No emojis, no curly quotes, no markdown, no bold. No "not only X but Y". No forced groups of exactly three items. Use "to" instead of "in order to". No "At its core". Use "because". No generic positive endings; end on concrete fact or plain natural invitation. Use commas. Vary sentence length naturally, state things directly, keep claims supported by captions.

We must include required words exactly: "производства", "2021", "жанр", "язык", "китайски", "quot", "cherie", "deville", "toma", "sofá", "sala", "sexy", "chinese", "chick", "hesitant". These are case-sensitive? Probably exactly as given. We'll include them exactly.

We need to produce 60-90 words. Let's count approximate words if we separate by spaces. We'll produce maybe 70 words.

We'll write something like:

"程女士 1v3 视频 展示 制作 年份 2021 жанр All Sex 语言 китайски quot cherie deville toma sofá sala sexy chinese chick hesitant 场景 在 沙发 上 与 三位 男性 互动 画面 高清 无水印 请 点击 上方 链接 查看 完整 图集"

Now count words (space-separated tokens). Let's count:

程女士 (1)

1v3 (2)
