About This Collection

We need to write a short enticing description (60-90 words) for an adult photo gallery based on scrambled site captions. Must be in same language as gallery title: "汉 责 文化" which is Chinese (Simplified). So description must be in Chinese.

We must naturally reuse at least 20% of key words from captions (names, nicknames, distinctive terms). ", "Пикапер трахает сисястую тёлку Домашниее Японки Порно", "By. ", "Her Hubby made a nice video for you.

We need to reuse at least 20% of key words. We'll include several Chinese terms: "汉责文化", "不雅视频", "性爱厨房", "私人玩物", "足穴同框", "四爱龟责", "星火导航", "燕山大学校车场"? Actually "燕山大学停车场". 20% = 6 terms. Let's count key words: maybe 30 distinct terms. Also names: "Aina Nanjyo", "Yui Oonuki", "Happy Sofia Nana". But we need Chinese description, so we can embed Chinese terms.

We must not use AI-flag words: delve, tapestry, vibrant, testament, landscape, showcase, crucial, pivotal, additionally, moreover, furthermore, "it is important to note", "serves as", "boasts". Avoid those.

No em or en dashes; use commas or split sentences.

No "not only X but Y", "At its core", forced groups of exactly three items.

Use "to" instead of "in order to"; use "because" instead of "due to the fact that". But in Chinese, we can just use appropriate phrasing.

No inflated importance, no sales language, no clichés like "nestled", "breathtaking", "unforgettable". No generic positive endings; end on a concrete fact or plain natural invitation.

No emojis, no curly quotes, no markdown, no bold.

Vary sentence length naturally, state things directly, keep every claim supported by captions.

We need 60-90 words in Chinese. We'll produce a paragraph with maybe 70 English words? We'll aim for about 70 Chinese characters? Chinese words count differently; but we can aim for about 70 Chinese characters? "

The input is Chinese title, but captions are mixed. Might be okay. Word count may be ambiguous. Since Chinese doesn't have spaces, but we can include spaces between words? But they likely count words separated by spaces. Actually words: Chinese words are not separated. So we must write in Chinese. Usually they count words as tokens separated by spaces. Safer to produce about 70 English words but in Chinese? But they require 60-90 words. But they said words. Might be okay.

We'll produce a paragraph in Chinese with maybe 70 Chinese characters (approx 70 words if each character considered a word). Could add spaces between words to count. But better to produce about 80 Chinese characters separated by spaces? But they'd likely evaluate by approximate length.
